Voicing Code in STEM Pratim Sengupta, Amanda Dickes, Amy Voss Farris, 2021-03-09 An exploration of coding that investigates the interplay between computational abstractions and the fundamentally interpretive nature of human experience The importance of coding in K 12 classrooms has been taken up by both scholars and educators Voicing Code in STEM offers a new way to think about coding in the classroom one that goes beyond device level engagement to consider the interplay between computational abstractions and the fundamentally interpretive nature of human experience Building on Mikhail Bakhtin's notions of heterogeneity and heteroglossia the authors explain how STEM coding can be understood as voicing computational utterances rather than a technocentric framing of building computational artifacts Empirical chapters illustrate this theoretical stance by investigating different framings of coding as voicing

Failure Vicki E. Alger, 2016-07-01 A comprehensive account and frank assessment of federal involvement in education is long overdue Education policy expert Vicki E Alger remedies this deficiency with her book Failure The Federal Miseducation of America's Children As its title indicates Failure makes no effort to sugar coat its findings Created in 1979 after a lobbying campaign that spanned generations the Department of Education has failed to live up to its promises Federal involvement whether related to testing funding or academic curricula has failed to abide by the Constitution's implication that education must remain the domain only of state and local governments and private institutions Most of all the central government's pervasive meddling in education has failed America's school children and their parents Education policy has long been mired in controversies often with opposing sides missing the mark Failure helps us step back from the skirmish du jour and redirects our focus to the big picture showing us what's gone wrong over the decades and the institutional causes of these failures It also offers a bold blueprint for returning the federal government to its constitutional role and for cultivating an educational system that meets the needs of students and parents rather than bureaucrats Concerned citizens of every stripe will benefit from Failure's history of federal education policy its brutally honest report card for the Department of Education its look at education systems across the globe and its ambitious policy recommendations Failure might even succeed in reframing the way the federal education establishment thinks about

education policy *Women in STEM Education* Lisbet Rønningsbakk, Karen Blackmore, 2023-12-05 We are delighted to present the inaugural Women in Education series of article collections At present less than 30% of researchers worldwide are women Long standing biases and gender stereotypes are discouraging girls and women away from science related fields and from pursuing a career in academia and in different professional environments especially when linked to STEM fields Science and gender equality are however essential to ensure sustainable development in all disciplines In order to change traditional mindsets gender equality must be promoted stereotypes defeated and girls and women should be encouraged to pursue academic careers Therefore Frontiers in Education is proud to offer this platform to promote the work of women scientists educators and professionals across all fields of STEM Education Female representation still needs to be improved in key roles in the field and the way in which an equitable education contributes to fairer and less biased academic and professional environments worldwide should be more investigated The work presented here highlights the diversity of research performed across the entire breadth of STEM Education research and presents advances in theory experiment and methodology with applications to compelling problems **Australian Education Index** ,1980
