Keys to the 21st Century Jérôme Bindé, 2001 As we enter the 21st century the third industrial revolution and the new forms of globalisation that accompany it are radically reshaping our societies and posing many new challenges The world appears richer more complex and interdependent but also more uncertain than ever This volume presents a compilation of the contributions made to an international conference organised by UNESCO in 1998 to discuss the issues which are likely to pose the greatest challenges in the new millennium

Dictionnaire culturel des sciences Nicolas Witkowski, 2001 L ambition de ce dictionnaire est moins de transformer le lecteur en spécialiste que de convaincre que la science fait pleinement partie de la culture générale et qu il est illusoire de tenter d en comprendre le sens si l on n étudie pas ses interactions avec la politique la philosophie littéraire la peinture ou la littérature

 Laemmle,Cédric Scheidegger Laemmle,Katharina Wesselmann,2021-02-22 Lists and catalogues have been en vogue in
 philosophy cultural media and literary studies for more than a decade These explorations of enumerative modes however
 have not yet had the impact on classical scholarship that they deserve While they routinely take a limited set of ancient
 models as their starting point there is no comparably comprehensive study that focuses on antiquity conversely studies on
 lists and catalogues in Classics remain largely limited to individual texts and with some notable exceptions offer little in
 terms of explicit theorising The present volume is an attempt to close this gap and foster the dialogue between the recent
 theoretical re appraisal of enumerative modes and scholarship on ancient cultures The 16 contributions to the volume
 juxtapose literary forms of enumeration with an abundance of ancient non sub or para literary practices of listing and
 cataloguing In their different approaches to this vast and heterogenous corpus they offer a sense of the hermeneutic
 epistemic and methodological challenges with which the study of enumeration is faced and elucidate how pragmatics
 materiality performativity and aesthetics are mediated in lists and catalogues Generations and Nationalism Alain-G
 Gagnon,Luc Turgeon,2025-09-02 Generations and Nationalism breaks new ground by placing the impact of generation and
 generational changes at the forefront of an investigation on the transformation of nationalist movements and the evolution of
 support for independence in Catalonia Quebec and Scotland The main objective of the book is to explore how a focus on
 generations and generational change can add first to the theoretical toolkit used in the study of nationalism and second can
 lead to a better understanding of the recent evolution of nationalism in three internal nations Catalonia Quebec and Scotland

The book is also an occasion to revisit the distinct evolution of nationalism in these three internal nations that have been the object of important comparative studies in the past and frequent comparisons in public discourses but in which nationalist movements have gone through relatively distinct transformations over the past decade. The different chapters tackle nation building, autonomy and self-determination, ethnic identity, conflict and accommodation, ethnonationalism, irredentism and separatism and immigration, naturalization and citizenship. The book is also unique to the extent that it establishes a dialogue between scholars who are specialists of public opinion, drawing on quantitative methods and scholars drawing on different comparative historical perspectives in sociology and political science. Containing both theoretical discussions of nationalism as well as case studies and comparative analyses of nationalist movements, *Generations and Nationalism* will be of great interest to students and scholars researching nationalism, public opinion, youth politics, political theory and quantitative and historical methods.

Post-Western Sociology - From China to Europe Laurence Roulleau-Berger, Li Peilin, 2018-05-15. This book is rooted in an epistemological approach to sociology in which the boundaries between Western and non-Western sociologies are acknowledged and built on. It argues that knowledge is organised in conceptual spaces linked to paradigms and programmes which in turn are linked to ethnocentred knowledge processes that until recently Western approaches including Post-Colonial French Social Science and American approaches have dominated. Non-Western theories and that Western theories have sometimes seemed incapable of explaining phenomena produced in other societies. It goes on to argue that the blurring of boundaries between Western and non-Western sociologies is very important and that such a Post-Western approach will mean co-production and co-construction of common knowledge, the recognition of ignored or forgotten scientific cultures and a global change in sociology which imposes theoretical and methodological detours, displacements, reversals and conversions. The book brings together a wide range of Western and Chinese sociologists who explore the consequences of this new approach in relation to many different issues and aspects of sociology.
