Steve Oakes, Martin Griffin, 2024-08-09 The Vespa Handbook builds on the success of Steve and Martin's acclaimed books The A Level Mindset and The GCSE Mindset by introducing 40 new activities that will help teachers improve the grades of their students. The handbook is a perfect introduction to the VESPA approach as well as a practical addition to previous resources. Just like their previous books, The Vespa Handbook will help teachers develop the five key characteristics and behaviours that students need in order to regulate their own learning: vision, effort, systems, practice, and attitude. When it comes to achieving academic success, these characteristics are crucial. The ability of students to have a vision, commit the effort, be organised, practise and revise well, and have a positive attitude and good work ethic are vital to their success. The 40 activities included are set out clearly and categorised thematically under the VESPA umbrella, making them easy to navigate and use in any setting. Each activity can be delivered one-to-one to a tutor, group, or to a whole cohort and is designed to take fifteen to twenty minutes to complete. These activities will help your students to set goals, work more efficiently, organise their resources, and manage their workload. The Vespa Handbook will empower learners to unlock their potential, overcome obstacles, and take control of their own knowledge and skills. It has been written with students in mind and includes spaces for them to record and reflect on their answers and organise their thought process. The book offers a comprehensive toolkit of study techniques, strategies, and approaches that can be applied for effective learning, planning, organization, and execution. Steve and Martin share practical advice and valuable insights for teachers looking to improve their students' resilience and ambition based on their combined 40-plus years of experience in teaching and coaching. Suitable for teachers, tutors, and parents who want to boost academic outcomes in 14-18 year olds and equip them with powerful tools and techniques in preparation for further education and employment.

Malaysian Media Studies: Integrating Perspectives (UM Press) Azizah Hamzah, Amira Firdaus, 2016 This edited volume revisits developments in the field of media education and media studies at a time when society is experiencing a ubiquitous networked digital media environment. Rapid advances in media and communication technologies and the accompanying developments in social, cultural, political, and economic realms pose unexpected challenges to the curricula of long-established media and communication schools. As opposed to rigidly structured nation-based mass media systems of the past century, the new global media sphere celebrates the breaking down of borders, whether spatial, cultural, or social. Today, in the second half of the second decade of the 21st century, this problem translates into what and how to teach students of media who, in all likelihood, are more adept media consumers and producers than their teachers. In a region where educational institutions and educators don't transform as fast as media technologies do

there is a need to problematize and to reflect upon the situation This edited volume examines critical issues related to media studies at local institutions of higher learning and includes a sampling of research charting new directions in local media scholarship Contributions to this edited volume reflect the shared concerns of media educators and researchers in Malaysia and two neighboring countries Indonesia and Thailand Three main themes underscore this volume reflecting their importance to the evolution of media education and to a certain extent research as well Historical development of media education and training Current developments and future trajectories of media education in a globalized digital media environment Analysis of media and society *Political Economy of Education in Lebanon* Husein Abdul-Hamid, Mohamed Yassine, 2020-03-18 Education is a source of national pride in Lebanon When the general public was asked how the education system was performing 76 percent of respondents had a positive opinion and these satisfaction rates have been consistently high over the years However perception of education quality does not reflect the reality of the sector and learning outcomes which are the determining metrics of success in education have been lower than the international average with a declining trend since 2007 This volume seeks to uncover why the education system in Lebanon is not reaching its full potential It uses a political economy approach to study the drivers and factors that guide education operations to produce and utilize education outcomes This includes the study of context stakeholders and processes that shape education policies institutions and activities It also aims to identify enablers of and constraints on policy change and implementation as well as the achievement of results In this context the analysis encompasses how education policies are developed how education consumables such as curricula textbooks and learning materials are produced distributed and used by learners how education services are delivered and monitored and how achieved results are measured It includes the identification of the most influential actors in the education arena as well as their vested interests It also examines unfavorable frameworks for action that are likely to block the adoption of reforms and delay or derail their implementation The system level analysis presented in this volume used a mixed method approach Qualitative and quantitative analyses were conducted based on a review and analysis of more than 1 900 research papers articles and books laws and policies expenditures trends and enrollment and outcome indicators Primary methods of inquiry were also used and included interviews focus group discussions and a household based perception survey **Resources in Education** ,1985 *Journal of the National Cancer Institute* ,1990 *2nd synthetic biology forum: system and synthetic biology for biofuels and bioproducts* Jean Marie François, Min Jiang, Mingjie Jin, Shihui Yang, 2023-01-02 **Parliamentary Debates (Hansard)**.
