Creating Global Bonds, Grade 12 Carla C. Johnson, Janet B. Walton, Erin E. Peters-Burton, 2023-03-21 What if you could challenge your twelfth grade students to explore energy consumption and climate change in their own communities and connect that information with other communities around the world With this volume in the STEM Road Map Curriculum Series you can Creating Global Bonds outlines a journey that will steer your students toward authentic problem solving while grounding them in integrated STEM disciplines Like the other volumes in the series this book is designed to meet the growing need to infuse real world learning into K 12 classrooms This interdisciplinary three lesson module uses project and problem based learning to help students create an action plan to address issues of energy consumption and climate change exploring the topic at both local and global levels Students will gather data on energy consumption and climate change in their communities partnering with international students to undertake problem solving activities that examine issues that are both common and unique to each community To support this goal students will do the following Identify modes and trends in energy consumption in their communities and regions Analyze how those patterns of energy consumption impact climate change Partner with students internationally to coordinate efforts to synthesize energy consumption data and discern connections across contexts taking the form of an international blog Design and present an action plan to address issues of energy consumption and climate change ultimately delivering a white paper and interactive web based presentation on local and international issues of energy consumption and climate change The STEM Road Map Curriculum Series is anchored in the Next Generation Science Standards the Common Core State Standards and the Framework for 21st Century Learning In depth and flexible Creating Global Bonds can be used as a whole unit or in part to meet the needs of districts schools and teachers who are charting a course toward an integrated STEM approach *Conflict and Governance* Susan Brown, 2005 The Authors interrogate the manner in which South Africas changing economy is re shaping the political and the social landscape Based on in depth analysis of the data suggestions are made for future policy development *Resources in Education* ,1988 Accountability in education: meeting our commitments UNESCO, 2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to

inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not Back cover
