

### Light Reflection

Read from Lesson 1 of the Reflection chapter at The Physics Classroom: <http://www.physicsclassroom.com/Class/refln/u1l1a.html>;

- Place a letter in the blank in order to classify the following objects as being either luminous (L) or illuminated (I) objects.  
Sun \_\_\_\_\_ Moon \_\_\_\_\_ Person \_\_\_\_\_ Whiteboard \_\_\_\_\_ Light bulb \_\_\_\_\_ Candle \_\_\_\_\_
- These diagrams are intended to represent the path of light from an object to an eye as the eyesights at the image of the object. Each diagram is incorrect. Discuss what makes them incorrect.

- State the law of reflection in the space below.

Consider the diagram at the right in answering the next three questions.

- The angle of incidence is denoted by angle \_\_\_\_\_.
- The angle of reflection is denoted by angle \_\_\_\_\_.
- If an incident ray of light makes an angle of  $35^\circ$  with the mirror surface then the angle of reflection is \_\_\_\_\_°.
- Why do windows of distant houses appear to reflect the sun only when rising or setting? Explain in words. Use the diagram to help, drawing appropriate light rays on the diagram.

- Use the law of reflection and the embedded protractor in order to draw the reflected ray associated with the given incident ray for the following plane mirror situations. (Markings are provided at  $15^\circ$  increments.)

- Now for a research question:

In this unit we will often discuss how the reflection of light from a mirror results in the formation of an image. The term image as used here has an obvious context - physics. But the term image has numerous other contexts - psychology (a positive self-*image*), religion (created in God's *image*), business (the company's *image*), medicine (an x-ray *image*), etc. Your research question involves finding a dictionary and looking up the definition of the word image. Write down several meaningful definitions from several contexts in the spaces below. (If you do not have a dictionary at home then you can use [dictionary.com](http://dictionary.com) or [wikipedia.org](http://wikipedia.org).)

- Now write in your own words a personal definition of what you believe an image of an object is:

of the Reflection and Refraction of Light Hendrik Antoon Lorentz, 2023-12-14 1997 the centennial year of the electron provides a good occasion to publish the first English translation ever made of H A Lorentz's doctoral dissertation of 1875. Just 22 years old Lorentz took up and handled magisterially one major unresolved problem of Maxwell's electromagnetic theory: the reflection and refraction of light. By then the superiority of Maxwell's electromagnetic ether theory over current elastic solid conceptions such as Fresnel's was not nearly a settled issue. In his dissertation Lorentz strove with considerable success to make it that. Still he found that neither theory allowed for a satisfactory account of dispersion. One intriguing aspect of Lorentz's earliest scientific achievement which within two years was to earn him the chair of theoretical physics at Leyden University is that a range of subjects soon to occupy him for the rest of his life are already clearly foreshadowed in it. So far Lorentz's first step in science has existed only in the original Dutch and in a French translation made long ago as part of the Collected Works. Here the joint translators have striven to provide a fluently readable full text while preserving the flavor of Lorentz original language and style.
