*Human Interaction, Emerging Technologies and Future Applications II* Tareq Ahram, Redha Taiar, Vincent Gremeaux-Bader, Kamiar Aminian, 2020-04-02 This book reports on research and developments in human technology interaction. A special emphasis is given to human computer interaction and its implementation for a wide range of purposes such as healthcare, aerospace, telecommunication and education among others. The human aspects are analyzed in detail. Timely studies on human centered design, wearable technologies, social and affective computing, augmented virtual and mixed reality, simulation, human rehabilitation and biomechanics represent the core of the book. Emerging technology applications in business, security and infrastructure are also critically examined, thus offering a timely, scientifically grounded but also professionally oriented snapshot of the current state of the field. The book is based on contributions presented at the 2nd International Conference on Human Interaction and Emerging Technologies Future Applications (IHET AI 2020) held on April 23-25 in Lausanne, Switzerland. It offers a timely survey and a practice-oriented reference guide to researchers and professionals dealing with design and/or management of the new generation of service systems.

**The Female Tradition in Physical Education** David Kirk, Patricia Vertinsky, 2016-02-12 The Female Tradition in Physical Education re-examines a key question in the history of modern education: why did the remarkably successful leaders of female physical education who pioneered the development of the subject in late nineteenth and early twentieth century England, Canada, Australia and New Zealand lose control in the years following the Second World War? Despite the later resurgence of second wave feminism, they never regained a voice, with the result that male leadership was able to shift the curriculum in ways that neglected the needs and interests of girls and young women. Drawing on new sources and a range of historiographical approaches and touching on related fields such as therapeutic exercise and dance, the book examines the development of physical education for girls in a number of countries to offer an alternative explanation to the dominant narrative of the demise of the female tradition. Providing an important contextualization for the state of contemporary female physical education, this is fascinating reading for anybody with an interest in the development of sport and physical education, women's and gender history and physical culture more generally.
