Computer Vision is the most important key in developing autonomous navigation systems for interaction with the environment. It also leads us to marvel at the functioning of our own vision system. In this book we have collected the latest applications of vision research from around the world. It contains both the conventional research areas like mobile robot navigation and map building and more recent applications such as micro vision etc. The first seven chapters contain the newer applications of vision like micro vision grasping using vision behavior based perception inspection of railways and humanitarian demining. The later chapters deal with applications of vision in mobile robot navigation camera calibration object detection in vision search map building etc.

LabVIEW Ian Fairweather, Anne Brumfield, 2011-12-12. LabVIEW™ has become one of the preeminent platforms for the development of data acquisition and data analysis programs. LabVIEW™ A Developer's Guide to Real World Integration explains how to integrate LabVIEW into real life applications. Written by experienced LabVIEW developers and engineers, the book describes how LabVIEW has been pivotal in solving real world challenges. Each chapter is self contained and demonstrates the power and simplicity of LabVIEW in various applications from image processing to solar tracking systems. Many of the chapters explore how exciting new technologies can be implemented in LabVIEW to enable novel solutions to new or existing problems. The text also presents novel tricks and tips for integrating LabVIEW with third party hardware and software. Ideal for LabVIEW users who develop stand alone applications, this down to earth guide shows how LabVIEW provides solutions to a variety of application problems. It includes projects and virtual instrumentation for most of the programs and utilities described. Many of the authors own software contributions are available on the downloadable resources.

Image Acquisition and Processing with LabVIEW Christopher G. Relf, 2003-07-28. Image Acquisition and Processing With LabVIEW combines the general theory of image acquisition and processing, the underpinnings of LabVIEW and the NI Vision toolkit examples of their applications and real world case studies in a clear systematic and richly illustrated presentation. Designed for LabVIEW programmers, it fills a significant gap in the technical literature by providing a general training manual for those new to National Instruments NI Vision application development and a reference for more experienced vision programmers. The downloadable resources contain libraries of the example images and code referenced in the text, additional technical white papers, a demonstration version of LabVIEW 6.0 and an NI IMAQ demonstration that guides you through its features. System Requirements: Using the code provided on the downloadable resources requires LabVIEW 6.1 or higher and LabVIEW Vision Toolkit 6.1 or higher. Some of the examples also require IMAQ Vision Builder 6.1.
