Life Sciences P1 2014 Essays:

Theoretical Sociology Seth Abrutyn, Kevin McCaffree, 2021-03-30 Since Durkheim's influential work a century ago sociological theory has been among the most integrative and useful tools for social scientists across many disciplines. Sociological theory has nevertheless due to its usefulness expanded so very broadly that some wonder whether the concept of general theory or even the attempt to link middle range theories is still of any use. This book a collection of top theorists reflecting on the present and future of the craft addresses this most important question. Taking their lead from Jonathan Turner's important recent work and drawing on their own broad experience Seth Abrutyn and Kevin McCaffree have organized the chapters in this book from the general integrative and review focused bookend chapters to more specific chapters on innovations in theory construction at the micro meso and macro levels. Moreover the book's microsociological content on interpersonal violence solidarity identity and emotion coheres with chapters in mesosociological dynamics on class education and networks which in turn integrate with the chapters on inequality justice morality and cultural evolution found in the section on macrosociology. The distinguished contributors share a distinct commitment to the development innovation and relevance of general sociological theory. This volume is an invaluable sourcebook for advanced students and social science faculty interested in understanding how sociological theory's past and present are informing its future.

Dealing with Mission Drift in Parachurch Agencies Israel K. Kombaté, 2025-01-31 Mission drift is a constant threat to any parachurch organization trying to remain mission true and holistically relevant in this post-Christian society. Defining it as a phenomenon in which Christian based mission agencies stray from their God-given vision and identity towards socio-humanitarian objectives this study considers this in light of Jesus's own holistic mission exemplified in Matthew 9:35-38 and Luke 4:18-19. This insightful investigation into seven Christian NGOs and NPOs seeks to reveal the underlying reasons and motivations for moving towards mission drift. Presenting an exegetical study of the ministry of Jesus Dr Kombaté offers a developed and nuanced understanding of the challenging forces that contribute to mission drift and puts forward tools to minimize its risk. A must read for missionaries pastors and leaders in parachurch organizations endeavouring to retain a strong biblically grounded commitment to following holistic mission.

Criminal Misconduct in Office Jeremy Horder, 2018-03-02 Should the criminal law be used to deter and punish corruption in politics from employing family members at public expense to improper spending on elections lobbying and cronyism? How did so many MPs avoid facing charges after the 2009 government expenses scandal? In this book Jeremy Horder tackles these questions and more. As well as offering the first treatment of the history philosophy and politics of the application of the offence of misconduct in office to Members of Parliament in England and Wales Horder explains how political corruption might be dealt with in future and how politicians could be held accountable for their actions so that they are deterred from betraying the public's trust. Use of the criminal law should not be the sole or even the main way to remedy all corruption in politics. Nevertheless for too long the

offence of misconduct in a public office has had an ambiguous status in the political realm. If we are to preserve the good health of government it must be seen as a constitutional fundamental. A charge of misconduct provides a way in which corrupt conduct on the part of legislators can be punished with an appropriate label holding them to account for the misuse of power by reference to the standards of ordinary people. When other civil law or regulatory means prove insufficient it should be possible for ordinary members of a jury and not for Parliamentarians or other officials to decide whether for example the expenditure of public money on legislators' private income and benefits amounts to a criminal abuse of the public's trust. This book offers an authoritative and accessible account of a bottom up jury standards led as opposed to a top down officials applying their own standards approach to the role of the criminal law in constitutional contexts.

Elusive Phenomena, Unwieldy Things Jutta Schickore, William R. Newman, 2024-02-26 This open access book provides a historical treatment of scientific control in experimentation in the longue durée. The introduction distinguishes four related strands in the history of experimental control: the development of practices to stabilize experimental conditions; the career of the comparative design; the unfolding of methodological discussions about control practices and designs; and the history of the term control. Each chapter brings these distinctions to bear on specific historical episodes. The focus is on experiments with complex elusive phenomena such as perception and learning, irregular movements and unobservable elements. Such experiments bring control issues to the fore because they are difficult to design and stabilize and often controversial. Together the chapters show that the local context shapes what exactly is controlled, how control can be accomplished and how controls are justified. They also show that control strategies and methodological ideas often remain stable for a long time and change only gradually. This book, as well as the volume on analysis and synthesis in experimentation by the same editors, contains contributions by an array of experts from multiple disciplines, making it suitable for historians and philosophers of science and students alike.

The Technopolitics of Communication in Modern India Pragya Dhital,2024-12-12 This book offers a groundbreaking account of the role of media technologies in Indian nationalism and democracy From the Brexit referendum in 2016 to the phenomenon of Trumpism there has been much speculation about the role played by new media in an apparent return of illiberal politics and primordial identities Dhital argues these developments could best be understood by not taking identity for granted as a static and exclusive form of affiliation She also emphasises how the technical and material are interwoven into human thought and action rather than acting upon them externally She accordingly focuses on the technopolitical means by which groups have been ventriloquised during critical periods in Indian political history across various media from newspapers and magazines to radio broadcasts speeches and online platforms Chapters cover prison writing produced during the emergency of 1975 77 regulation of public speech during the 2014 general election and the Citizenship Amendment Act protests of 2019 20 Through these case studies Dhital works towards an alternative more reflexive basis for popular representation one that does not sacralise the people and assume power in their name

 Berthoud,2018-11-21 Academic Paper from the year 2018 in the subject Philosophy Miscellaneous grade 2 3 Humboldt
 University of Berlin course Wittgenstein s ber Gewissheit language English abstract The relationship between knowledge and
 certainty varies according to conception I argue that knowledge and certainty are usually equivalent but there are cases in
 which certainty is possible without knowledge and knowledge is possible without certainty The connection between
 knowledge and certainty does not change much when considering Ren Descartes philosophy because methodological
 skepticism consists of doubting beliefs that are uncertain That there exist external objects is uncertain because a malicious
 demon could be deceiving us by creating the illusion of an external world Although Descartes suggests that we can doubt all
 of our beliefs his conception of science consists of secure insight Omnis scientia est cognitio certa et evidens Descartes 1907
 This means that all science is certain and evident knowledge or a high degree of certainty Three centuries later G E Moore
 had another reasoning when writing A Defense of Common Sense and Proof of an External World He suggests that doubting
 that the world exists is unnecessary we must trust that the universe exists He is against George Berkeley s suggestion that
 matter does not exist everything is just ideas of the mind of God and to be is to perceive This is similar to propositions from
 Gottfried Wilhelm Leibniz who was an idealist because he claimed that all possible worlds lie in God and we are substances
 observing the best alternative Leibniz 2014 43 46 Moore suggests that it is irrational to believe such premises He held
 intuitions that a person has in everyday life the common sense philosophy We cannot be certain yet we claim to know many
 things Moore also purports that the external world is real and he tried to prove it Moore 1993a His argument goes as follows
 P1 Here is one hand P2 Here is another C1 There are at least two external objects in the world C2 Therefore an external
 world exists He argues that he had the experience of observing his hands and reiterates that at least his hands offer the sum
 of two objects which at a specified time existed Ibid **Catalogs of the Scripps Institution of Oceanography Library**
