third volume covering most other aspects of medicine that utilize spectra from the ultraviolet through the visible into the near infrared The chapters in this book are divided into three groups The first group deals with nuclear medicine and includes Chapters 1 8 These chapters are arranged to begin with a broad introduction to the subject Chapter 1 followed by a sequence of four chapters Chapters 2 5 that provide an in depth review of the imaging instrumentation developed for the field Chapter 6 deals with evaluation of imaging device performance while Chapters 7 and 8 discuss two areas of considerable research activity
