Natural Science Grade 9 November 2013 Exemplar:

Designing Emergency Management Wee-Kiat Lim, 2020-11-22 This book looks at the then nascent emergency management sector in China specifically the 2003-2012 period that arose from the 2003 SARS crisis and subsequently set the stage for its responses to the COVID-19 pandemic. Covering not only the amended and new laws and regulations at the national level, the book also includes the rearrangement and creation of the organizational structures as well as the response plans for individual emergencies that were either recrafted or created during this period. Beyond chronicling the milestones and products of this transformation, this book highlights the key ideas and ideals that guided the various stakeholders from the governing elites to the policy experts during this process. The book demonstrates how definitions of emergency management and emergency categories as well as other ideational objects were initially either absent or weakly developed but were refined to the extent that they helped corral disparate actors into China's new organizational field of emergency management.

Education in Vietnam Martin Hayden, Thi Le Tran, 2024-08-02 Offering insights into the current and projected future state of the education system in Vietnam, this edited volume is an authoritative sourcebook for scholars, policy analysts, academic staff, and students. Vietnam is well on its way to joining the dress circle of high-achieving education nations in Asia. International surveys of the academic aptitude and ability of the nation's youth consistently place it well above relevant regional and global averages. This accomplishment is remarkable for a country with a gross domestic product per capita of only US \$2,785 in 2020. The dynamics of Vietnam's national education system are comprehensively documented in the book. Each of the country's education sectors is critically appraised as well as the culture of education in Vietnam. Specific issues concerning funding and equity, quality and accreditation, the teaching of curriculum areas, the internationalisation of the system, and the provision of educational opportunities for young people with disabilities are carefully analysed against a background of relevant global trends. With contributions from well-established and highly respected local experts with high aspirations for the future development of the national education system in Vietnam, this book will be a must-read for academics and students of Southeast Asian studies and comparative education.
