Deduyo & Carie Justine P. Estrellado, 2022-12-06

The Research Probe TRP is a proceedings publication of institutional conferences and research competitions. It focuses on four broad themes: education and development studies, humanities and social sciences, science technology engineering and mathematics, and business management and accounting. This publication provides a platform for experts and practitioners from various fields in the dissemination of their research works that address industry trends and needs, scientific findings, and international concerns. Both the institutional conferences and proceedings publication promote a wider horizon for researchers through an open access paradigm. TRP publishes articles employing any of the various research methods and strategies. It accepts any specific topic within these broad subjects. It also encourages interdisciplinary articles that broadly discuss key topics relevant to the core scope of the journal.

NICE at 25 Peter Littlejohns, Keith Syrett, 2024-08-30

Marking its 25th anniversary, this fascinating collection examines the pioneering work of the National Institute for Health and Care Excellence (NICE). Setting standards for the delivery of healthcare, issuing guidance on public health, and assessing and making recommendations on health technologies, NICE has attracted widespread international attention, emulation, and comment. The authors in this collection, drawn from a broad range of disciplinary backgrounds, offer analysis of key issues which have informed NICE's work, from the principles of health economics to patient engagement to the legal basis on which NICE operates. Covering many of the most important themes within contemporary debates on health policy and management today, this insightful collection will interest students and researchers as well as policy makers in the field.

Data Science, AI, and Machine Learning in Drug Development Harry Yang, 2022-10-03

The confluence of big data, artificial intelligence (AI), and machine learning (ML) has led to a paradigm shift in how innovative medicines are developed and healthcare delivered. To fully capitalize on these technological advances, it is essential to systematically harness data from diverse sources and leverage digital technologies and advanced analytics to enable data-driven decisions. Data science stands at a unique moment of opportunity to lead such a transformative change. Intended to be a single source of information, *Data Science, AI, and Machine Learning in Drug Research and Development* covers a wide range of topics on the changing landscape of drug R&D, emerging applications of big data, AI, and ML in drug development, and the build of robust data science organizations to drive biopharmaceutical digital transformations. Features: Provides a comprehensive review of challenges and opportunities as related to the applications of big data, AI, and ML in the entire

spectrum of drug R D Discusses regulatory developments in leveraging big data and advanced analytics in drug review and approval Offers a balanced approach to data science organization build Presents real world examples of AI powered solutions to a host of issues in the lifecycle of drug development Affords sufficient context for each problem and provides a detailed description of solutions suitable for practitioners with limited data science expertise Bulletin of the American Museum of Natural History ,2023 Comprises articles on geology paleontology mammalogy ornithology entomology and anthropology

The Indian National Bibliography ,2017-10 Indian National Bibliography B. S.
