Life Science Papergrade11final Exam 2014:

Academic and Professional Writing in an Age of Accountability Shirley Wilson Logan, Wayne H. Slater, 2018-12-27

What current theoretical frameworks inform academic and professional writing? What does research tell us about the effectiveness of academic and professional writing programs? What do we know about existing best practices? What are the current guidelines and procedures in evaluating a program's effectiveness? What are the possibilities in regard to future research and changes to best practices in these programs in an age of accountability? Editors Shirley Wilson Logan and Wayne H. Slater bring together leading scholars in rhetoric and composition to consider the history, trends, and future of academic and professional writing in higher education through the lens of these five central questions. The first two essays in the book provide a history of the academic and professional writing program at the University of Maryland. Subsequent essays explore successes and challenges in the establishment and development of writing programs at four other major institutions, identify the features of language that facilitate academic and professional communication, look at the ways digital practices in academic and professional writing have shaped how writers compose and respond to texts, and examine the role of assessment in curriculum and pedagogy. An afterword by distinguished rhetoric and composition scholars Jessica Enoch and Scott Wible offers perspectives on the future of academic and professional writing. This collection takes stock of the historical, rhetorical, linguistic, digital, and evaluative aspects of the teaching of writing in higher education. Among the critical issues addressed are how university writing programs were first established and what early challenges they faced; where writing programs were housed and who administered them; how the language backgrounds of composition students inform the way writing is taught; the ways in which current writing technologies create new digital environments; and how student learning and programmatic outcomes should be assessed.

VESPA Handbook Steve Oakes, Martin Griffin, 2024-08-09

The Vespa Handbook builds on the success of Steve and Martin's acclaimed books *The A Level Mindset* and *The GCSE Mindset* by introducing 40 new activities that will help teachers improve the grades of their students. The handbook is a perfect introduction to the VESPA approach as well as a practical addition to previous resources. Just like their previous books, *The Vespa Handbook* will help teachers develop the five key characteristics and behaviours that students need in order to regulate their own learning: vision, effort, systems, practice, and attitude. When it comes to achieving academic success, these characteristics are crucial. The ability of students to have a vision, commit the effort, be organised, practise, and revise well, and have a positive attitude and good work ethic are vital to their success. The 40 activities included are set out clearly and categorised thematically under the VESPA umbrella, making them easy to navigate and use in any setting. Each activity can be delivered one-to-one to a tutor group or to a whole cohort and is designed to take fifteen to twenty minutes to complete. These activities will help your students to set goals, work more efficiently, organise their resources, and manage their workload. *The Vespa Handbook* will empower learners to unlock their potential, overcome obstacles, and take control of their own knowledge.

and skills It has been written with students in mind and includes spaces for them to record and reflect on their answers and organise their thought process The book offers a comprehensive toolkit of study techniques strategies and approaches that can be applied for effective learning planning organization and execution Steve and Martin share practical advice and valuable insights for teachers looking to improve their students resilience and ambition based on their combined 40 plus years of experience in teaching and coaching Suitable for teachers tutors and parents who want to boost academic outcomes in 14 18 year olds and equip them with powerful tools and techniques in preparation for further education and employment
