*Locational Tournaments in the Context of the EU Competitive Environment* Stephan Dreyhaupt, 2007-11-03 As part of the research undertaken by the Department of Economics at the European Business School this book explores the role that institutions play in the process of economic competition between jurisdictions for mobile investment These locational tournaments are perpetuated not simply by classical factor endowments of their respective locations but also by government interventions that impact both market imperfections and FDI flows The resulting rivalry between competing institutional arrangements which has been termed institutional competition lies at the very heart of the author s analysis The context for his research is provided by the global forces of trade and foreign direct investment that have expanded the scope for international production due to widespread liberalization of trade and capital flows continuing regional integration rapid technological innovations and the resulting decrease in cross border transaction costs Foreign direct investment has been markedly affected by these developments Countries depend now more heavily on foreign direct investment as a major portion of international capital flows giving even smaller countries a greater potential and determination to compete for FDI As a result not only have attitudes towards FDI dramatically changed over the past decade but so have the scope and intensity of the beauty contests associated with it      Economics 02/03 Don Cole, 2000      **Dollars & Sense** , 2003
