Provides comprehensive coverage on recidivism risk needs assessment tools. Correctional and healthcare professionals around the world utilize structured instruments referred to as risk needs assessment tools to predict the likelihood that an offender will recidivate. Such tools have been found to provide accurate and reliable evaluations and are widely used to assess, manage, and monitor offenders both institutionally as well as in the community. By identifying offenders in need of different levels of intervention, examining causal risk factors, and individualizing case management plans, risk needs assessment tools have proven invaluable in addressing the public health issue of recidivism. *Recidivism Risk Needs Assessment Tools* brings together the developers of the most commonly used risk needs assessment tools to provide a comprehensive overview of their development, peer-reviewed research literature, and practical application. Written by the leading professionals in the field of risk needs assessment, the book provides chapters on Recidivism Risk Assessment in the 21st Century, Performance of Recidivism Risk Assessment Instruments in Correctional Settings, Correctional Offender Management Profiles for Alternative Sanctions (COMPAS), the Federal Post Conviction Risk Assessment Instrument, the Inventory of Offender Risks, Needs, and Strengths (IORS), the Level of Service Inventory-Revised (LSI-R), the Ohio Risk Assessment System (ORAS), the Self Appraisal Questionnaire (SAQ), the Service Planning Instrument (SPI), the Static Risk Offender Needs Guide, the Revised STRONG-R Offender Group Reconviction Scale (OGRS), the Forensic Operationalized Therapy Risk Evaluation System (FOTRES), the Risk-Canvi, and more. Systematically identifies currently validated recidivism risk needs assessment tools. Reviews research on recidivism risk needs assessment tools used internationally. Each chapter presents sufficient detail to decide whether a given recidivism risk needs assessment tool is right for your practice. *Recidivism Risk Needs Assessment Tools* is ideal for correctional, probation, and parole, and behavioral health professionals.

To derive statistics about crime to estimate its levels and trends, assess its costs, and its impacts on society and inform law enforcement approaches to prevent it, a conceptual framework for defining and thinking about crime is virtually a prerequisite. Developing and maintaining such a framework is no easy task because the mechanics of crime are ever evolving and shifting, tied to

shifts and development in technology society and legislation Interest in understanding crime surged in the 1920s which proved to be a pivotal decade for the collection of nationwide crime statistics Now established as a permanent agency the Census Bureau commissioned the drafting of a manual for preparing crime statistics intended for use by the police corrections departments and courts alike The new manual sought to solve a perennial problem by suggesting a standard taxonomy of crime Shortly after the Census Bureau issued its manual the International Association of Chiefs of Police in convention adopted a resolution to create a Committee on Uniform Crime Records to begin the process of describing what a national system of data on crimes known to the police might look like Report 1 performed a comprehensive reassessment of what is meant by crime in U S crime statistics and recommends a new classification of crime to organize measurement efforts This second report examines methodological and implementation issues and presents a conceptual blueprint for modernizing crime statistics
