Advancing Africa's Sustainable Development Alain L. Fymat, 2018-11-14 While many African countries lag behind the rest of the industrialised world in scientific and medical research and development the situation is progressively improving This is why the Society for the Advancement of Science in Africa was established to contribute to economic advancement and sustainability through science research education and innovation This book provides a selection of papers from the Advancement of Science in Africa s fourth annual conference The conference was held under the overarching theme of science technology and innovation in Africa with several important sub themes including but not limited to improving health research and disease surveillance education collaborating in research responding to epidemic diseases with high mortality in Africa and promoting women s interest in science careers The collection illustrates how although the chapter contributors come from various countries and universities representing their own academic research they all share a common interest in advancing science technology and innovation in Africa

Handbook of Research on Nurturing Industrial Economy for Africa's Development Nafukho, Frederick

Muyia, Boniface Makulilo, Alexander, 2021-03-19 A robust manufacturing sector is a necessity and a sufficient condition for any country's human and economic development as it creates employment and alleviates poverty. During this Fourth Industrial Revolution era, there is an urgent need in Africa to optimally utilize the existing resources to support manufacturing or else risk allowing the continent to fall behind in the industrial economy. Innovative strategies are needed that can unlock Africa's manufacturing potential by exploring key areas that may help Africa mature and launch modernized economies that will benefit the developed world's industrial economy. The Handbook of Research on Nurturing Industrial Economy for Africa's Development examines various innovations necessary for Africa's economic development, including drivers of the manufacturing economy such as education, agriculture, human capital, science and technological innovations, language, politics, and business environments. The book explores strategies to increase Africa's economic diversity, complexity, productivity, and ultimately competitiveness, and for the continent to realize its manufacturing industrial potential. Further chapters focus on African countries' industrial economies in the African context and facilitating the fulfillment of the Sustainable Development Goals (SDGs) and the African Union's Agenda 2063. This book is a valuable reference tool for government officials, economists, industrialists, practitioners, stakeholders, researchers, academicians, and students interested in the industrial economic development of Africa.

Transport Planning and Mobility in Urban East Africa Nadine Appelhans, Wolfgang Scholz, Sabine Baumgart, 2020-11-26 This book critically explores the relationship between mobility patterns, transport provision, and urban development in East African cities. Bringing together contributions on the futures of mobility in urban East Africa, the chapters examine transport provision, mobility patterns, location-specific modes of transport, and transformative factors for transport and mobility in the rapidly urbanising region. The book outlines different mobility needs to be addressed in transport planning to serve and shape the respective cities and examines the decision-making process in transport planning and the level of accountability to the public. The contributors show the dialectic between innovation in transport mobility and urban development under rapid urbanisation and discusses how to practically integrate mobility and transport provision into urban development. This book will be of interest to scholars in urban planning, transport planning, transport geography, social sciences, and African studies.
