Life Orientation September 2014 Examination:

Measurement Invariance Rens Van De Schoot, Peter Schmidt, Alain De Beuckelaer, 2015-10-05 Multi item surveys are frequently used to study scores on latent factors like human values attitudes and behavior Such studies often include a comparison between specific groups of individuals either at one or multiple points in time If such latent factor means are to be meaningfully compared the measurement structures including the latent factor and their survey items should be stable across groups and or over time that is invariant Recent developments in statistics have provided new analytical tools for assessing measurement invariance MI The aim of this special issue is to provide a forum for a discussion of MI covering some crucial themes 1 ways to assess and deal with measurement non invariance 2 Bayesian and IRT methods employing the concept of approximate measurement invariance and 3 new or adjusted approaches for testing MI to fit increasingly complex statistical models and specific characteristics of survey data The special issue started with a kick off meeting where all potential contributors shared ideas on potential papers This expert workshop was organized at Utrecht University in The Netherlands and was funded by the Netherlands Organization for Scientific Research NWO VENI 451 11 008 After the kick off meeting the authors submitted their papers all of which were reviewed by experts in the field The papers in the eBook are listed in alphabetical order but in the editorial the papers are introduced thematically Although it is impossible to cover all areas of relevant research in the field of MI papers in this eBook provide insight on important aspects of measurement invariance We hope that the discussions included in this special issue will stimulate further research on MI and facilitate further discussions to support the understanding of the role of MI in multi item surveys *Exploring Positive Psychology*

Erik M. Gregory, Pamela B. Rutledge, 2016-10-03 Looking for an introduction to positive psychology that offers real life examples This overview of the science of happiness supplies case studies from some of the world s most successful organizations and describes ways to experience the personal impact of this exciting scientific field Rather than focusing on treating what is wrong with a person positive psychology seeks to understand and foster the things that drive happiness creativity and emotional fulfillment This is a relatively new area of psychological study and this reference book presents the research and practice of positive psychology in an informative and accessible format Readers are given a history of the field its current applications and the future implications of this psychological discipline Case studies from companies such as The Body Shop Volvo Zappos and Google highlight the impact of positive psychology when it s applied in a modern business setting These case studies along with biographies of leaders in the field highlight each chapter and connect the dots between the empirical theory of positive psychology and its practice Readers also receive tools to apply the practices to their own lives

The Impact of Shared Vision on Leadership, Engagement, and Organizational Citizenship Richard Eleftherios Boyatzis, Kylie Rochford, Scott N. Taylor, 2015-10-28 According to management and psychology courses as well as legions of consultants in organizational psychology shared vision in dyads teams and organizations can fill us with hope and inspire new possibilities or delude us into following false prophets However few research studies have empirically examined the impact of shared vision on key organizational outcomes such as leadership effectiveness employee engagement organizational citizenship coaching and organizational change As a result the field of organizational psychology has not yet established a causal pattern of whether if and how shared vision helps dyads teams and organizations function more effectively The lack of empirical work around shared vision is surprising given its long standing history in the literature Bennis and Nanus 1982 showed that distinctive leaders managed attention through vision The practitioner literature has long proclaimed that vision is a key to change while Conger and Kanungo 1998 discussed its link to charismatic leadership Around the same time positive psychology appeared in the forms of Appreciative Inquiry Cooperrider Sorensen Whitney Yaeger 2000 and Positive Organizational Scholarship Cameron Dutton Quinn 2003 In this context a shared vision or dream became a legitimate antecedent to sustainable change But again empirical measurement has been elusive More recently shared vision has been the focus of a number of dissertations and quantitative studies building on Intentional Change Theory ICT Boyatzis 2008 at dyad team and organization levels of social systems These studies are beginning to lay the foundations for a systematic body of empirical knowledge about the role of shared vision in an organizational context For example we now know that shared vision can activate neural networks that arouse endocrine systems and allow a person to consider the possibilities of a better future Jack Boyatzis Leckie Passarelli Khawaja 2013 Additionally Boyatzis Akrivou 2006 have discussed the role of a shared vision as the result of a well developed set of factors that produce a desired image of the future Outside of the organizational context positive visioning has been known to help guide future behavior in sports psychology Loehr Schwartz 2003 medical treatment Roffe Schmidt Ernst 2005 musical performance Meister Krings Foltys Boroojerdi Muller Topper Thron 2004 and academic performance Curry Snyder Cook Ruby Rehm 1997 This Research Topic for Frontiers in Psychology is a collection of 14 original papers examining the role of vision and shared vision on a wide variety of desired dependent variables from leadership effectiveness and executive performance to organizational engagement citizenship and corporate social responsibility and how to develop it through coaching

Ammonoid Paleobiology: From anatomy to ecology
Christian Klug, Dieter Korn, Kenneth De Baets, Isabelle Kruta, Royal H. Mapes, 2015-07-22 This two volume work is a testament to the abiding interest and human fascination with ammonites We offer a new model to explain the morphogenesis of septa and the shell we explore their habitats by the content of stable isotopes in their shells we discuss the origin and later evolution of this important clade and we deliver hypotheses on its demise The Ammonoidea produced a great number of species that can be used in biostratigraphy and possibly this is the macrofossil group which has been used the most for that purpose Nevertheless many aspects of their anatomy mode of life development or paleobiogeographic distribution are still poorly known Themes treated are biostratigraphy paleoecology paleoenvironment paleobiogeography evolution phylogeny and ontogeny Advances such as an explosion of new information about ammonites new technologies such as isotopic analysis tomography and virtual paleontology in general as well as continuous discovery of new fossil finds have given us the opportunity to present a comprehensive and timely state of the art compilation Moreover it also points the way for future studies to further enhance our understanding of this endlessly fascinating group of organisms

Executive Function(s): Conductor, Orchestra or Symphony? Towards a Trans-Disciplinary Unification of Theory and Practice Across Development, in Normal and Atypical Groups
Lynne A. Barker, Nicholas Morton, 2018-08-30 There are several theories of executive function s that tend to share some theoretical overlap yet are also conceptually distinct each bolstered by empirical data Norman and Shallice 1986 Shallice Stuss and Alexander 2007 Burgess Gilbert Burgess Miyake et al 2000 The notion that executive processes are supervisory and most in demand in novel situations was an early conceptualization of executive function that has been adapted and refined over time Norman Shallice 2001 Burgess Gilbert ii automatic orientation towards stimuli in the environment or internally driven thought Burgess Gilbert iii the automatically generated interface between tacit processes and strategic conscious thought Barker Andrade Romanowski Morton and Wasti 2006 Morton and Barker 2010 and iv distinct but interrelated executive processes that maintain update and switch across different sources of information Miyake et al 2000 One problem is that executive dysfunction or dysexecutive syndrome Baddeley Eslinger Barker Andrade Andr s Chevignard et al 2000 Cripe 1998 Fortin Godbout Lamberts Evans Barker Morton Morrison McGuire 2011 Complete elimination of environmental confounds runs the risk of generating results that cannot be generalized beyond constrained circumstances of the test environment Barker Andrade Burgess et al 2006 Finally translational issues also confound executive function research across different disciplines psychiatry cognitive science and developmental psychology and across typically developing and clinical populations including Autism Spectrum Disorders Head Injury and Schizophrenia Blakemore Taylor Barker Heavey McHale 2013 Consequently there is a need for unification of executive function approaches

across disciplines and populations and narrowing of the conceptual gap between theoretical positions clinical symptoms and measurement
