Count Girls In Karen Panetta, Katianne Williams, 2018-08-01 To succeed in science and tech fields today girls don't have to change who they are. A girl who combines her natural talents, interests, and dreams with STEM skills has a greater shot at a career she loves and a salary she deserves. The authors present compelling research in a conversational, accessible style and provide specific advice and takeaways for each stage of schooling from elementary school through college, followed by comprehensive STEM resources. This isn't a book about raising competitive test-acing girls in lab coats; this is about raising happy, confident girls who realize the world of opportunities before them. **Community Quality-of-Life Indicators** Frank

Ridzi, Chantal Stevens, Melanie Davern, 2020-06-25 This book offers critical insights into the thriving international field of community indicators, incorporating the experiences of government leaders, philanthropic professionals, community planners, and a wide range of academic disciplines. It illuminates the important role of community indicators in diverse settings and the rationale for the development and implementation of these innovative projects. This book details many of the practical, how-to aspects of the field, as well as lessons learned from implementing indicators in practice. The case studies included here also demonstrate how using a variety of data applications, leaders of today are monitoring and measuring progress, and communities are empowered to make sustainable improvements in their wellbeing. With examples related to the environment, economy, planning, community engagement, and health, among others, this book epitomizes the constant innovation, collaborative partnerships, and the consummate interdisciplinarity of the community indicators field of today. **Women in**

Science Now Lisa M. P. Munoz, 2023-10-31 Silver Medal in the Social Change and Social Justice Category 2024 Nautilus Book Awards Winner 2024 Choice Outstanding Academic Title. Women working in the sciences face obstacles at virtually every step along their career paths. From subtle slights to blatant biases, deep systemic problems block women from advancing or push them out of science and technology entirely. *Women in Science Now* examines solutions to this persistent gender gap, offering new perspectives on how to make science more equitable and inclusive for all. This book shares stories and insights of women from a range of backgrounds working in various disciplines, illustrating the journeys that brought them to the sciences, the challenges they faced along the way, and the important contributions they have made to their fields. Lisa M. P. Munoz combines these narratives with a wealth of data to illuminate the size and scope of the challenges women scientists face while highlighting research-based solutions to help overcome these obstacles. She presents groundbreaking studies in social psychology and organizational behavior that are informing novel approaches for combating historic and ongoing inequities. Through a combined focus on personal experiences and social science research, this timely book provides both a path toward greater gender equity and an inspiring vision of science and scientists. **Toward Comprehensive**
