Higher Education for and beyond the Sustainable Development Goals

Tristan McCowan, 2019-08-29 This book analyses the role of the university in working towards the Sustainable Development Goals In contrast to the previous Millennium Development Goals higher education is seen to have a crucial role in this new agenda Yet how can the university fulfil these weighty expectations and are the dominant trends in higher education supporting or undermining this vision This book draws on the idea of the developmental university a model characterised by its porous boundaries with society and commitment to teaching research and community engagement in the public interest The author examines case studies from Latin America Africa and other regions to analyse how this model can be revived countering recent trends of marketisation status competition and unbundling The book also considers alternatives to the developmental model drawing on indigenous knowledge systems looking beyond the SDG framework to the creation of a new form of society This timely volume will be of interest and value to those working in the field of sustainable development and to students and scholars of comparative education international development and higher education studies

 not only on epistemology but also on the complex relationship between epistemology and ontology The chapters address

 classroom to the church in ways which invite us to begin to decolonize ourselves and rethink normative assumptions about
 everything from academic writing to research methods and language teaching The book provides scholars and teachers with
 inspiration for how to teach linguistics in ways that challenge colonial hegemonies and that allow one to do sociolinguistics
