Linde Hydraulic Control (LHC)

Digital electro-hydraulic controller

Instead of a control unit, an integrated module has taken the place of the control unit. Instead of a hydraulic controller, a computer electronic controller is used. It has a very powerful microcontroller system that controls functions for the drive unit and the working hydraulics (2).

Adaptation to various trucks

The electronic control unit is capable of controlling trucks from a variety of series and with different drive systems. To use different truck parameters and sensors, each truck model has a control unit that is adapted to the truck.

Troubleshooting

The processor of the electronic control unit analyzes analog and digital signals. The processor recognizes digital signals and system errors, and displays an error message on the display module on the control unit. In addition, the control unit activates a variety of functions according to the error's highest priority.

- Working light failure
- Recognition function of the internal combustion engine
- The truck starts with automatic start/stop and off the engine mode
- The truck starts in the emergency function, the internal combustion engine starts off
- An error code appears on the display

These functions can be activated by switching off the combustion engine and the engine switch. During a restart, the control unit checks whether the error is still present. If the error is no longer present, the truck starts normal operation. If the error persists, the error code appears on the display and one of the measures listed above is carried out.

Changing the controller

4.1.1.1.1.1.1

Problems regarding component damage due to electrostatic discharge (ESD) damage to working elements will occur if the controller is moved.

The controller is equipped with a "Threat plug" which is attached to the back to avoid static damage. Connections must never be left open. The upper part of the controller and the software version of the controller can be read out via the back connector.

If the controller is replaced, the personnel using the controller must be notified and they adapted to the code format. All necessary information is available on the code format.
