Worthing,R. J. Hance,British Crop Protection Council,1991      **Working Posture Assessment** Daniela Colombini,Enrico Occhipinti,2018-09-03 This book covers how to analyze awkward working postures particularly of the spine and lower limbs in specific groups exposed The methods covered suggests how to evaluate the postures correctly taking account of the duration and sequence of the tasks involved even in very complex scenarios where workers are involved with multiple tasks and work cycles varying from day to day Excel spreadsheets located on the authors website [www.epmresearch.org](http://www.epmresearch.org) have been developed to gather condense and automatically process the data The tools serve to implement the strategy for calculating risk associated with exposure to awkward postures i e the TACOS method Included are 5 case studies which include physiotherapists workers from construction archaeological digs vineyards and kindergarten teachers Features Provides a coherent definition of what the study of awkward postures is Clarifies and explains which parameters need to be detected and analyzed for the study of the working postures Defines the phases of a proper organizational study e g tasks postures duration and how often the postures will last in the working cycle Presents a new and original risk calculation model for awkward postures with particular attention to the study of the spine and the lower limbs Offers a free excel spreadsheet located on the authors website which implements the strategy for calculating risk associated with exposure to awkward postures      **The Great Starvation Experiment** Todd Tucker,2006-05-02 What does it feel like to starve To feel your body cry out for nourishment to think only of food How many fitful hungry nights must pass before dreams of home cooked meals metastasize into nightmares of cannibalism Why would anyone volunteer to find out In The Great Starvation Experiment historian Todd Tucker tells the harrowing story of thirty six young men who willingly and bravely faced down profound consuming hunger As conscientious objectors during World War II these men were eager to help in the war effort but restricted from combat by their pacifist beliefs So instead they volunteered to become guinea pigs in one of the most unusual experiments in medical history one that required a year of systematic starvation Dr Ancel Keys was already famous for inventing the K ration when the War Department asked for his help with feeding the starving citizens of Europe and the Far East at the war s end Fascists and Communists it was feared could gain a foothold in war ravaged areas Starved people Keys liked to say can t be taught Democracy The government needed to know the best way to

rehabilitate those people who had been severely underfed during the long war To study rehabilitation Keys first needed to create a pool of starving test subjects Gathered in a cutting edge lab underneath the football stadium at the University of Minnesota Dr Keys test subjects forsook most food and were monitored constantly so that Dr Keys and his scientists could study the effects of starvation on otherwise healthy people While the weight loss of the men followed a neat mathematical curve the psychological deterioration was less predictable Some men drank quarts and quarts of water to fill their empty stomachs One man chewed as many as forty packs of gum a day One man mutilated himself to escape the experiment Ultimately only four of the men were expelled from the experiment for cheating a testament to the volunteers determination and toughness To prevent atrocities of the kind committed by the Nazi doctors international law now prevents this kind of experimentation on healthy people But in this remarkable book Todd Tucker captures a lost sliver of American history a time when cold scientific principles collided with living breathing human beings Tucker depicts the agony and endurance of a group of extraordinary men whose lives were altered not only for the year they participated in the experiment but forever
