Expert Choice for Windows, Version 9.0, 1995 **GIS for Group Decision Making** Piotr Jankowski, 2001-01-18 In today's society it is very common for decisions that influence us all to be made by a combination of interested parties all with their own agenda. In this instance, how can we be sure that the decision is the correct one, not just decided by the group with the most political influence or most money? Such groups have now become fundamental decisions. *InfoWorld*, 1985-01-28. InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. Computer Aided Policy Making Ray Wyatt, 2005-08-12. This book will prove a unique source of information and instruction for anyone seeking to make better human-oriented policy, whether urban planner, business strategist, or manager in the field of education, health, or welfare. Ingeniously, Wyatt has created two books in one: the main text covers the types of software package available, mainstream software, peripheral software, innovative software, frontier software; the lessons generated from the software are outlined in lesson boxes. Readers can use the text alone to familiarize themselves with the computer packages or read the boxes only, or they can do both. *InfoWorld*, 1985-01-28. The conference provides opportunities for the cross-fertilization of approaches, techniques, and ideas from the many fields that comprise AIED, including computer science, cognitive and learning sciences, education, game design, psychology, sociology, linguistics, as well as many domain-specific areas. The conference was held virtually due to the COVID-19 pandemic. *The Sustainability of Oil Ports* Xuemuge Wang, Michael Roe, Shaofeng Liu, 2020-05-26. This book provides an original analysis of the problems of ensuring that oil ports are sustainable in the broadest sense of the concept, including environmental, social, technical, and resource aspects. Taking China as its frame for analysis, chosen because of the authors' expertise and because it is the largest oil import country in the world, much of it by ship, it presents a detailed investigation of the issues that make up a sustainable port profile using a variety of established statistical and operational techniques. These are examined before an holistic model is derived. Recommendations are provided for future application both in China and elsewhere, and also a range of ways suggested for how the framework could be adapted to other types of ports and locations. **INFORMATION &**
