Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korku Agbobli, Henri-Vincent Ndjave-Ndjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the

qualitative approach adopted made use of the interview method to collect data. On the other hand, studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data. However, there were some academic papers which used mixed methodology because of the nature of the study. Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology. Contribution made to scholarship: The articles come from individual researchers and each article in the proceedings is unique. Mostly there is no general argument leading from one contribution to the next. However, it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth. With regard to human capital development, papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic. Thus, the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors. Furthermore, it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation. With regard to technology and big data impact on organisational performance, it was evident that system performance, memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance. Most of the articles' contribution reemphasised technology education and training as a means of digitising business and improving effectiveness. Target audience: The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics, information management, business education, development studies, social sciences and technology. It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment.

It shall be easy to use and intuitively supportive of project managers. So far, evidence indicates that these targets are successfully met. One of its key recognitions and in consequence a distinctive feature of this book is the impact that the project manager's personality has on the fate of the project. The project manager's successful self management in work life and in leadership processes should be considered as important in any endeavor as all other project management processes.

**Strategic Lean Thinking and Value Management for Gravel Roads in Zambia** Richard Kasongo, 2015-11-25  
Doctoral Thesis Dissertation from the year 2015 in the subject Engineering General course Civil Engineering Management Construction Project Management language English abstract This research topic is entitled Strategic Lean Thinking and Value Management for Gravel Roads The study captured 82 respondents as research sample to a case study of Output Performance Based Contracts OPRCs for the Construction and Maintenance of Gravel Roads in Zambia Purposive sampling was used as most research participants were drawn from second generation OPRCs that were active between 2009 and 2014 The study was aimed at devising new Construction and Maintenance Contract methods for gravel roads that are based on Lean Thinking and Value Management philosophies in Zambia The established epistemological background to the study is that most of the Zambian road network is of gravel or earth standards and is therefore imperative that they are well maintained to attain desired service levels to properly serve the intended beneficiaries the road users The Road Development Agency Annual Report of 2009 indicated that 33 000 Km of the total 40 671 Km core road network is classified as gravel roads unpaved which are at the moment mostly in a deteriorated state The study revealed that currently in Zambia Gravel Road Construction projects are commonly being realised through the use of traditional Contracts such as admeasured by the use of Bills of Quantities BOQs the Lump sum and Cost plus etc These are mainly short term form of Contracts which to some extent lack some components of sustainable maintenance regimes thereby rendering the Government and other Promoters efforts futile as gravel roads sooner or later deteriorate just after the first rain season upon their construction This was theoretical perspective which served as driver to the Research problem The study noted that current forms of Contracts did not inspire aspire and spur the spirit of ownership as the local people were left out in the planning and design stages of gravel road projects Despite all the attempts made by Government through the RDA and other implementing Agencies the

Road Construction Industry in general has failed to get the best value for money through the use of these conventional types of Contracts One of the reasons for this failure according to Womack and Jones 2003 is that it is hard to define and realise value this is partly because most Producers Road Contractors want to make what they are already making and partly because Customers only know some variant of what they are already getting
