Law and Life. Why Law? Peter van Schilfgaarde, 2019-03-25 This book is based on the assumption that the world is governed by a widespread field of interconnected laws In this field man made laws legal laws have to coexist with the laws of nature the laws of science and the laws of logic They have to find their place in relation to a certain society They have to relate to the demands of morality ethics custom and trust They have to follow the laws of language They have to deal with a variety of professional and esthetic rules They have to defend their position between art and craft Finally and significantly they have to cope with a host of different ideas about truth This book approaches law as a human construct meant to strengthen society as it develops through the ages Knowledge of the law legal knowledge is of doubtful value if it ignores the demands and ideals of society The same goes for the thinking leading to legal knowledge This book focuses on a basic concept That concept is met if the legal thinking leading to legal knowledge reaches the level of an independent law and society oriented contemplative discipline A discipline which is in that sense and to that extent in touch with cherished or less cherished parts of given law

*Price Related Terms in Standard Form Contracts* Yeşim M. Atamer, Pascal Pichonnaz, 2019-11-19 This book explores various approaches around the world regarding price term control and particularly discusses the effectiveness of two major paths ex ante regulatory and ex post judicial intervention Price control and its limits are issues that affect all liberal market economies as well as more regulated markets For the past several years courts in many different countries have been confronted with the issue of whether and to what extent they should intervene regarding price related terms in standard form contracts especially in the area of consumer contracts Open price clauses flat remunerations price adjustment clauses clauses giving the seller supplier the right to ask for additional payments bundling or partitioning practices etc a variety of price related terms are used to manipulate customers choices often also by exploiting their behavioral biases The result is an unfavorable contract that is later challenged in court However invalidating a given price term in standard forms e g of a banking or utilities contract only has an inter partes effect which means that in thousands if not millions of similar contracts the same clauses continue to be used Effective procedural rules are often lacking Therefore pricing patterns that serve to hide rather than to reveal the real cost of goods and services require special attention on the part of regulators The aim of this book is to determine the various approaches in the world regarding price term control and particularly to discuss the efficiency of both paths ex ante regulatory and ex post judicial intervention Thanks to its broad comparative analysis this book offers a thorough overview of the methods employed in several countries It gathers twenty eight contributions from national rapporteurs and one supra national rapporteur EU to the 2018 IACL Congress held in Fukuoka These are supplemented by a general report presented at the same IACL Congress which includes a comparative analysis of the national and supranational reports The national contributors hail from around the globe including Africa 1 Asia 5 Europe 17 the European Union 1 and the Americas 5

**Law and Economic Development** William A. W. Neilson,1993 Competition Law and Consumer Protection Katalin Judit Cseres,2005-01-01 The assumption that competition law and consumer protection are mutually reinforcing is rarely challenged The theory seems uncontroversial However because a positive interaction between the two is presumed to be self evident the frequent conflicts that do in fact arise are often dealt with on an ad hoc basis with no overarching legal authority There is a clear need for a detailed and coherent understanding of exactly where the complements and tensions between the two policy areas exist Dr Cseres in depth analysis provides that understanding Proceeding from the dual perspective of law and economics that is of justice fairness and reasonableness on the one hand and of efficiency of the other she fully considers such underlying issues as the following the role of competition law and consumer law in a free market economy the notion of consumer welfare the effect of the modernisation of EC competition law for consumers economics theories of information bounded rationality and transaction costs the special significance of vertical agreements and merger control and how consumers are affected by information asymmetries The ultimate focus of the book is on current and emerging EC law in which a rapprochement between the two areas seems to be under way Dr Cseres provides a knowledgeable guide to the various strands of theory policy and jurisprudence that she shows ought to be taken into account in the process including schools of thought and law and policy experience in both Europe and the United States A special chapter on Hungary where post 1989 law and practice reveal a fresh and distinctly forward looking understanding of the matter is one of the book s most extraordinary features Competition Law and Consumer Protection stands alone as a committed contribution to bridging a gap in legal knowledge the significance of which grows daily It will be of immeasurable value to a wide range of professionals from academics and researchers to officials policymakers and practitioners in competition law consumer protection advocacy economic theory and planning business administration and various pertinent government authorities

**Microeconomics** A. Schotter,2001 The author provides a cohesive narrative that ties all the chapters together

**Revolutions in Law and Legal Thought** Zenon Bankowski,1991 *Economics of Contract Law* ,1989 **Intellectual Property and Market Freedom** Adrian Sterling,1997 This second volume in the Perspectives in Intellectual Property Series looks at the economics of intellectual property rights and their interaction with market freedom It aims to review the inherent contradiction between the monopolistic character of IP on the one hand and the common perception that it is a pre requisite of competition

**Economic Efficiency in Law and Economics** Richard O. Zerbe,2001 This work introduces a different way of thinking about the concept of economic efficiency that is both consistent with its historical derivation and arguably more useful than concepts currently used An expanded version of Kaldor Hicks efficiency as an axiomatic system is proposed
