Evidence-Based Inquiries in Ethno-STEM Research Iman C Chahine,Josef de Beer,2021-01-01 The purpose of the edited volume is to provide an international lens to examine evidence based investigations in Ethno STEM research Ethno science Ethno technology Ethno engineering and Ethno mathematics These themes grew out of multi national multi institutional and multi disciplinary efforts to preserve as well as epitomize the role that Indigenous Knowledge Systems IKS play in cognitive development and its vital contributions to successful and meaningful learning in conventional and non conventional contexts Principled by the Embodied Situated and Distributed Cognition ESDC this innovative book will provide evidence supporting the embeddedness of a thinking in acting model as a fundamental framework that explains and supports students acquisition of scientific knowledge So often western science curricula are experienced as irrelevant since it does not take cognizance of the daily experiences and world in which the learner finds himself This book takes a socio cultural look at IKS and applies research in neuroscience to make a case its incorporation in the STEM Science Technology Engineering and Mathematics classroom We use the Embodied Situated Distributed Cognition ESDC Model as conceptual framework in this book Although the value of IKS is often acknowledged in curriculum policy documents teachers are most often not trained in incorporating IK in the classroom Teachers lack of the necessary pedagogical content knowledge PCK in effectively incorporating IK in their classrooms is a tremendous problem internationally Another problem is that IK is often perceived as pseudo science and scholars advocating for the incorporation of IK in the school curriculum often do not contextualize their arguments within a convincing theoretical and conceptual framework **Language Contact. Volume 2** Jeroen

Salmons,Wim Vandenbussche,2025-04-21 Targeting a full range of students and scholars this volume provides a total of 50 chapters illustrating the linguistic dynamics and the dynamics of inter individual and societal language contact as well as the dynamics of multidisciplinary language contact studies Fueled by a wealth of data from a rich variety of contact situations its geographically balanced case studies are governed by the triangulation between a focus on language structure and change a sincere drive of sociopolitical and academic agency and the confrontation with an everyday reality that can be unkind to and ignorant of those two factors The volume clearly demonstrates the social relevance of our trade in a time burdened with ecolinguistic challenges **Teaching Writing to Children in Indigenous Languages** Ari

Sherris,Joy Kreeft Peyton,2019-02-18 This volume brings together studies of instructional writing practices and the products of those practices from diverse Indigenous languages and cultures By analyzing a rich diversity of contexts Finland Ghana Hawaii Mexico Papua New Guinea and more through biliteracy complexity and genre theories this book explores and demonstrates critical components of writing pedagogy and development Because the volume focuses on Indigenous languages it questions center margin perspectives on schooling and national language ideologies which often limit the number of Indigenous languages taught the domains of study and the age groups included The Geography of South Africa
