Fontijn,Arjan Louwen,Sasja van der Vaart,Karsten Wentink,2013 Europe is dotted with tens of thousands of prehistoric barrows In spite of their ubiquity little is known on the role they had in pre and protohistoric landscapes In 2010 an international group of archaeologists came together at the conference of the European Association of Archaeologists in The Hague to discuss and review current research on this topic This book presents the proceedings of that session The focus is on the prehistory of Scandinavia and the Low Countries but also includes an excursion to huge prehistoric mounds in the southeast of North America One contribution presents new evidence on how the immediate environment of Neolithic Funnel Beaker TRB culture megaliths was ordered another one discusses the role of remarkable single and double post alignments around Bronze and Iron Age burial mounds Zooming out several chapters deal with the place of barrows in the broader landscape The significance of humanly managed heath in relation to barrow groups is discussed and one contribution emphasizes how barrow orderings not only reflect spatial organization but are also important as conceptual anchors structuring prehistoric perception Other authors dealing with Early Neolithic persistent

places and with Late Bronze Age Early Iron Age urnfields argue that we should also look beyond monumentality in order to understand long term use of ritual landscapes The book contains an important contribution by the well known Swedish archaeologist Tore Artelius on how Bronze Age barrows were structurally re used by pre Christian Vikings This is his last article written briefly before his death This book is dedicated to his memory This publication is part of the Ancestral Mounds Research Project of the University of Leiden *Catalogue: Authors* Peabody Museum of Archaeology and Ethnology.
