**Labour Law Rules! Third Edition** Marie McGregor, 2017-11-17 Labour Law Rules is a book designed primarily as an introductory text for students encountering labour law for the first time whether their goal is a law degree or some other discipline involving a basic knowledge of the labour relations regulatory regime in South Africa. In the past two years since publication of the first edition of Labour Law Rules some significant events took place which impacted on labour law resulting in a number of changes proposed to reform labour law. The new edition of Labour Law Rules aims to lay a sound and up to date foundation of basic labour law rules which will enable students to be empowered to assist in shaping the future working environment and laws of the country. The second edition of the bestselling text book Labour Law Rules continues to provide a highly accessible text on labour equity social security skills development and related laws fully updated to include the latest changes and amendments in labour law in South Africa. It discusses these laws against the backdrop of South Africa as a member state of the ILO and the economic and socio economic context in the country.

**Remedies** The City Law School, 2020-08-20 Remedies ensures that trainee barristers can correctly identify remedial relief and calculate damages for their clients. Combining explanations of substantive law with problems and worked examples, trainee barristers are encouraged to apply their knowledge and find practical solutions to problems likely to be encountered in practice.

**The Radicals' City: Urban Environment, Polarisation, Cohesion** Ralf Brand, Sara Fregonese, 2016-02-24 Bringing together comparative case studies from Belfast, Beirut, Amsterdam and Berlin, this book examines the role of the urban environment in social polarisation processes. In doing so, it provides a timely and refreshingly innovative voice in the confusing babble on counter terrorism, urban conflict and community cohesion. Despite their socio-political differences, these cities are telling cases of how the location and shape of very mundane objects such as rubbish bins, bridges, clothes stores, shopping malls and cafés, in addition to the obvious fences, walls and barbed wire, are often subject to heated controversies and influence the way urban conflict is lived and practised. Within a Science and Technology Studies (STS) theoretical framework, the authors provide a systematic analysis of these four cities and provide many concrete and richly illustrated examples of material agency without losing sight of their specific historical, political, geographical and social conditions. The STS angle permits some surprising yet extremely convincing conclusions which are of use not only for a range of practitioners but also to scholars interested in the social shaping processes and the consequences of urban artefacts. The authors argue that although architecture and urban design is clearly not the sole cause of conflict and polarisation, neither is it completely innocent. Conversely, it cannot be the silver bullet to solve related problems and to create community cohesion. However, the materiality of our cities must not be ignored; in fact, it can and should be enrolled in our efforts. The book contains detailed descriptions of such positive cases as inspiration for practitioners as diverse as policy makers, architects, urban designers, planners, community workers, consultants or police officers.
