*The Animals Among Us* John Bradshaw,2017-09-28 A pioneering study richly empathetically and affectionately respectful of the human animal bond Sunday Times Why do humans love animals The bestselling author of In Defence of Dogs and Cat Sense gives us the answers Keeping pets is expensive time consuming and seemingly irrational so why do so many of us have an animal in our lives Modern day pet keeping has been justified for many reasons from the potential therapeutic role pets can play to their appealing cuteness But pet keeping is much more than just a simple pastime It is part of the broader history of humanity's relationship with animals a relationship that comes from deep within our nature As John Bradshaw reveals in this highly original new work our connection with animals is one of the very things that makes us human In The Animals Among Us Bradshaw takes us to the heart of Anthrozoology a new science dedicated to discovering the true nature and depth of the human animal bond Following the thread of our affection for animals from today's pet lovers all the way back to our ancient ancestors Bradshaw reveals how animals have always been an integral part of our lives indeed they have shaped the evolution of our minds and our bodies The ways in which we relate to animals today stem ultimately from our evolutionary

journey from hominid to Homo sapiens An affinity for animals drove our evolution as humans Now as increasing numbers of species are under threat John Bradshaw shows us that pet keeping can act as a bridge between the domestic and the wild even aiding conservation If we lose the animals among us he warns we risk losing an essential part of ourselves *The One Minute Cat Manager* Kac Young,2019-07-04 The One Minute Cat Manager suggests 60 second techniques that anyone can practise with their cat With expert insight into the inner workings of the feline mind and analysis of cat behaviour this book will facilitate a deeper understanding and stronger bond with your feline friend **Riddles at work in the early medieval tradition** Megan Cavell,Jennifer Neville,2020-03-13 Capitalising on developments in the field over the past decade Riddles at work provides an up to date microcosm of research on the early medieval riddle tradition The book presents a wide range of traditional and experimental methodologies The contributors treat the riddles both as individual poems and as parts of a tradition but most importantly they address Latin and Old English riddles side by side bringing together texts that originally developed in conversation with each other but have often been separated by scholarship Together the chapters reveal that there is no single right way to read these texts but rather a multitude of productive paths This book will appeal to students and scholars of early medieval studies It contains new as well as established voices including Jonathan Wilcox Mercedes Salvador Bello and Jennifer Neville **The Lion in the Living Room** Abigail Tucker,2017-09-05 Originally published in hardcover in 2016 by Simon Schuster **Cats I Have Loved** Sara Munson Deats with Conrad Gordon Deats,2015-07-09 Cats I Have Loved celebrates my life with cats Ten of these indelible individuals each totally different from the others shared my adult life I structured this book around these ten unforgettable singular individuals allotting each a chapter in the hope of capturing the colorful and varied personalities of each of my furry companions and probing the life lessons each has taught me Additional chapters are devoted to other animals that enlivened my life including the canines and felines from the Animal Protection League of Tampa Bay where I served for several years as the Adoption Lady the University of South Florida feral cats and the amazing birds bunnies and dogs that have fluttered hopped and trotted in and out of my life as fleeting guests rather than permanent residents This book also chronicles my husband s and my struggles to aid animal welfare and prevent animal abuse Intertwined with the narrative of all these remarkable creatures is the story of a couple who always enjoyed the succor and solace of their feline friends Ultimately this book is a tribute to the feline companions that have so enriched my life providing entertainment and anxiety laughter and migraines celebration and heartache while teaching me so much about love and the meaning of life **Dog Sense** John Bradshaw,2014-09-09 Dogs have been mankind s faithful companions for tens of thousands of years yet today they are regularly treated as either pack following wolves or furry humans The truth is dogs are neither and our misunderstanding has put them in serious crisis What dogs really need is a spokesperson someone who will assert their specific needs Renowned anthrozoologist Dr John Bradshaw has made a career of studying human animal interactions and in Dog Sense he uses the latest scientific research to show how humans can live in harmony with not

just dominion over their four legged friends From explaining why positive reinforcement is a more effective and less damaging way to control dogs behavior than punishment to demonstrating the importance of weighing a dog s unique personality against stereotypes about its breed Bradshaw offers extraordinary insight into the question of how we really ought to treat our dogs

**The Heart of the Wild** Joel Berger,Susan Clayton,2024-08-13 How do we keep a love of nature and the wild alive in our increasingly human dominated world According to the scientists and writers in this book doing so is of paramount significance however the answer is not necessarily blanket preservation of wild places which is increasingly unrealistic Rather the answer to how to care for nature is more nuanced and often entails acceptance of a broader definition of wild as well and what it means to experience nature This book will be divided into two parts In the first part authors will explore and complicate what wildness means For example science writer Emma Marris argues that spontaneous vegetation and free roaming animals in cities actually possess more autonomy than the wolves or pines of Yellowstone biologist Jonathan Losos asks whether invasive species are necessarily detrimental and may even play a role in restoring ecosystems and psychologist Susan Clayton discusses new ways of experiencing nature particularly via technology and what the benefits and limitations may be In the second half of the book essays will reflect on the roles of naturalism natural history and nature education communication in helping us connect with wild species and landscapes at a time when many of those connections have frayed or even lost altogether Provided by publisher

**The Behaviour of the Domestic Cat** John W. S. Bradshaw,1992 The behavior of domesticated animals is a subject of great interest to pet owners as well as to students of animal behavior and veterinary medicine Indeed it is now attracting greater attention among research workers and being taught increasingly to students of zoology and veterinary science This book presents a readable overview of the behavior of the domestic cat adopting both a mechanistic and functional approach but making full reference to the scientific literature The first half of the book is concerned mainly with physiological developmental and psychological aspects while the second half looks at social behavior relationships with humans and welfare The final chapter written by well known behavior therapist Peter Neville considers problem behaviors This book will appeal both to students and research workers but will also interest members of the general public seeking a scientific but jargon free approach to this fascinating subject
