This light will start flashing when the brake is near its finished state. This allows time to slow the brake up before the automatic brake goes off.

When the lamp arm starts to cycle, the light will go solid and stay solid until the lamp arm returns to its home position. At this time, the light will return to flashing until the bulb is changed.

When the left-hand bed is right, the left-hand gauge will read right in the green area showing that side of hole is filled with hay. As the gauge falls in the green area or into the red area, it indicates that side of the hole needs hay to bottom the hole.
