Alexander, Pearson Education Canada, Maggie Martin Connell, 2007      **Math Makes Sense!: A Constructivist Approach To The Teaching And Learning Of Mathematics** Ana Helvia Quintero, Hector Rosario, 2016-03-02

The methods for teaching mathematics usually follow the structure of mathematics. The problem with this is that the structure of mathematics took centuries of elaboration to develop and is not the same as how one originally experiences mathematics. Based on research of how mathematics is actually learned, this book presents an innovative approach for teaching mathematics that will engage pupils and can have lifelong benefits for how they take on board more advanced mathematical topics. Math Makes Sense makes use of the realistic mathematics education (RME) philosophy which bridges the gap between informal mathematics learning such as in day to day life and more formal teaching in school. Many real life situations as examples for learning are included as well as different mathematical and logic puzzles that will stimulate learning and foster understanding. The ideas presented are not confined to one national curriculum and so can be helpful worldwide to teachers, instructors, both in practice and those still in training, private tutors, homeschooling parents, and educational researchers.

Practical and proven math tasks to maximize student thinking and learning. Building upon the blockbuster success of *Building Thinking Classrooms in Mathematics*, Peter Liljedahl has joined forces with co-author Maegan Giroux to bring the Building Thinking Classrooms (BTC) framework to life in this new book *Mathematics Tasks for the Thinking Classroom, Grades K-5*. But this book is so much more than simply a collection of good thinking tasks. It delves deeper into the implementation of the 14 practices from the BTC framework by updating the practices with the newest research and focusing on the practice through the lens of rich math tasks that address specific mathematical learning outcomes or standards. Across the 20 non-curricular tasks and 30 curricular tasks used as models, this book helps you choose tasks to fit your particular math standards, goals, and the competencies you want your students to build. Walks you through all the steps and scripts to launch, facilitate, and consolidate each task. Shares examples of possible student solutions along with hints you might offer to help their thinking along. Offers tasks for consolidation, example notes to my future forgetful self, and mild, medium, and spicy check your understanding questions. CYUs for every thin sliced sequence of curricular tasks. Imparts

reflections from the authors on each task The book closes with specific guidance on how to find more tasks or craft your own non curricular and curricular tasks along with answers to educators frequently asked questions It includes access to a companion website that includes downloadables and a task template for creating your own tasks Whether you are new to BTC or a seasoned user Mathematics Tasks for the Thinking Classroom Grades K 5 will help teachers coaches and specialists transform traditional math classrooms into dynamic and thought provoking learning spaces **Math Makes Sense 6.**
