*Conquer Medical Coding 2018* Jean Juek, Stacey Mosay, Daphne Neris, 2017-12-25 Take a real world approach to coding that prepares you for the AAPC or AHIMA certification exams and for professional practice in any health care setting The book is also a handy resource you can turn to throughout your career Unique decision trees show you how to logically assign a code It is the only text that breaks down the decision making process into a visual and repeatable process You will learn exactly how to select the correct ICD 10 CPT and HCPCS codes Each section parallels the Official Coding Guidelines with a special emphasis on commonly used codes A wealth of learning tools and tips along with critical thinking exercises and real life case studies provide the practice you need to master coding Brief reviews of A P and pathophysiology put the codes into perfect context

**Beyond the Code** Noam Shemtov, 2017-09-07 Although the law on infringement is relatively straightforward in relation to the copying of literal and textual elements of software it is the copying of non literal and functional elements that poses complex and topical questions in the context of intellectual property IP protection In many cases it is these non literal and functional elements that contain the real value of a software product This book concerns the copying of non literal and functional elements of software in both the United States and European Union using a holistic approach to address the most topical questions facing experts concerned with legal protection of software products across a range of technological platforms The book focuses on six distinct but interrelated areas contract copyright patents trade dress designs and trade secrets discussing these areas separately and in relation to one another The book discusses software as a multilayered functional product setting the scene for other legal discussions by highlighting software's unique characteristics It examines models for the provision of software addressing licensing patterns and overall enforceability as well as the statutory and judicial tools for regulating the use of such licences It assesses the protection of non literal and functional software elements under EU and US laws focusing on internal architecture interfaces behavioural elements and GUIs
