Music Technology And Education Amplifying Musicality:

Music Technology and Education Andrew Brown, 2014-12-05 Music Technology in Education lays out the principles of music technology and how they can be used to enhance musical teaching and learning in primary and secondary education. Previously published as Computers in Music Education, this second edition has been streamlined to focus on the needs of today's music education student. It has been completely updated to reflect mobile technologies, social networks, rich media environments, and other technological advances. Topics include Basic audio concepts and recording techniques, Enhanced music instruction with interactive systems, web-based media platforms, social networking, and musicianship software. Administration and management of technology resources, Distance education and flexible learning. Music Technology in Education provides a strong theoretical and philosophical framework for examining the use of technology in music education while outlining the tools and techniques for implementation in the classroom. Reflective Questions, Teaching Tips, and Suggested Tasks link technology with effective teaching practice. The companion website provides resources for deeper investigation into the topics covered in each chapter and includes an annotated bibliography, website links, tutorials, and model projects.

Computers in Music Education Andrew R. Brown, 2007 Publisher description **Creativities, Technologies, and Media in Music Learning and Teaching** Gary E. McPherson, Graham F. Welch, 2018-05-03 Creativities Media and Technology in Music Learning and Teaching is one of five paperback books derived from the foundational two-volume Oxford Handbook of Music Education. Designed for music teachers, students, and scholars of music education, as well as educational administrators and policy makers, this fifth book in the set comprises three complementary sections: musical creativity, as practice, music teaching and learning through technology, and the interplay of media, music, and education. The first section reviews notions of musical creativity, examining practice-based perspectives to support and develop understanding of the diverse types of creativity found within music education practice across the globe. In the second section, authors explore the essential role of technology in musical discourse and in various forms of musical learning, even as technology continually evolves and the needs and possibilities continue to rapidly change. The third section provokes readers to assess their own thinking about the transformative changes occurring within the discipline as a result of advances in media and the increasing infiltration of media into all aspects of life: the classroom and music making. Contributors: Andrew R. Brown, Pamela Burnard, Bernadette Colley, Ian Cross, Rokus de Groot, Steven C. Dillon, Randi Margrethe Eidsaa, David G.
