Digital content includes: Test engine that provides full-length practice exams or customized quizzes by chapter or by exam domain.

*The Scriptorium and Library at Monte Cassino, 1058-1105* Francis Newton, 1999-04-29 In all the history of hand-written books, one of the most distinctive and handsome scripts is that of the abbey of Monte Cassino. This study examines for the first time in detail the development of this script during the Abbey's greatest period of wealth and influence under Desiderius, abbot 1058-1087, and his successor Oderisius, abbot 1087-1105. The characteristic Cassinese hand was established long before, but in this period it was transformed into what is today considered its classic form. The present study rests on a fresh examination of many details of the Beneventan South Italian script in aspects incompletely studied before. It aims to provide a new history of Monte Cassino as a writing centre and to offer a context for many unique or valuable texts, manuscripts that it processed.

*The Future of the Teaching and Learning of Algebra* Kaye Stacey, Helen Chick, Margaret Kendal, 2006-04-11 Kaye Stacey, Helen Chick, and Margaret Kendal, The University of Melbourne, Australia. Abstract: This section reports on the organisation, procedures, and publications of the ICMI Study: The Future of the Teaching and Learning of Algebra. Key words: Study Conference, organisation, procedures, publications. The International Commission on Mathematical Instruction (ICMI) has since the 1980s conducted a series of studies into topics of particular significance to the theory and practice of contemporary mathematics education. Each ICMI Study involves an international seminar, the Study Conference, and culminates in a published volume intended to promote and assist discussion and action at the international, national, regional, and institutional levels. The ICMI Study, running from 2000

to 2004 was on The Future of the Teaching and Learning of Algebra and its Study Conference was held at The University of Melbourne Australia from December to 2001 It was the first study held in the Southern Hemisphere There are several reasons why the future of the teaching and learning of algebra was a timely focus at the beginning of the twenty first century The strong research base developed over recent decades enabled us to take stock of what has been achieved and also to look forward to what should be done and what might be achieved in the future In addition trends evident over recent years have intensified Those particularly affecting school mathematics are the massification of education continuing in some countries whilst beginning in others and the advance of technology
