Mechanics of Materials James Monroe Gere, Stephen Timoshenko, 1997-01-01      *Dynamic Response and Failure of Composite Materials and Structures* Valentina Lopresto, Langella Antonio, Abrate Serge, 2017-05-17 *Dynamic Response and Failure of Composite Materials and Structures* presents an overview of recent developments in a specialized area of research with original contributions from the authors who have been asked to outline needs for further investigations in their chosen topic area. The result is a presentation of the current state of the art in very specialized research areas that cannot be found elsewhere in the literature. For example, Massab presents a newly developed theory for laminated composite plates that accounts for imperfect bonding between layers with new solutions for problems involving thermal effects. This theory is new and computationally efficient and the author describes how it fits in the broader context of composite plate theory. Abrate discusses the design of composite marine propellers and presents a detailed derivation of the equations of motion of a rotating blade including centrifugal effects and the effects of pre twisting and other geometric parameters. This book is a major reference resource for academic and industrial researchers and designers working in aerospace, automobiles and the marine engineering industry. Presents recent developments in a research field that has experienced tremendous advances because of improved computational capabilities, new materials and new testing facilities. Includes contributions from leading researchers from Europe and the USA who present the current state of the art including unique and original research. Provides extensive experimental results and numerical solutions. Appeals to a broad range of professional researchers working in aerospace, automotive and marine engineering fields.      *Rock Engineering and Rock Mechanics: Structures in and on Rock Masses* R. Alejano, Áurea Peruchó, Claudio Olalla, Rafael Jiménez, 2014-05-12 *Rock Engineering and Rock Mechanics: Structures in and on Rock Masses* covers the most important topics and state of the art in the area of rock mechanics with an emphasis on structures in and on rock masses. The 255 contributions including 6 keynote lectures from the 2014 ISRM European Rock Mechanics Symposium EUROCK 2014 Vigo Spain 27-29 May.      **Mechanics of Materials**, 2005      **Solutions Manual : Mechanics of Materials** R.
