

Cell Biology Unit Study Guide - Answer Key

1. A student could tell the difference between onion skin cells and cheek cells because the onion skin cells have a cell wall and chloroplasts
2. What is the difference between a prokaryotic and a eukaryotic cell? Prokaryotes have no membrane-bound organelles
3. Why does a virus require a host cell? Because they are not able to make proteins on their own
4. What type of organisms are prokaryotes? bacteria
5. The function of a cell membrane is to (1) control what enters and leaves the cell, (2) support the shape of the cell, and (3) contain identification markers for other cells.
6. In the final phase of completion, proteins are modified by special enzymes in what organelle? Golgi apparatus
7. In which organelle would water and dissolved materials be stored? vacuole
8. Describe the structure and function of the following organelles: endoplasmic reticulum, ribosomes, Golgi apparatus, mitochondrion.
(a) ER - network of interconnected membranes forming sacs and canals; transports proteins,
(b) ribosomes - ribosomal RNA; site of protein synthesis
(c) Golgi apparatus - membranous sacs; modify and package proteins
(d) mitochondrion - membranous sacs; produces ATP
9. Osmosis is defined as the movement of water molecules from a high concentration to a low concentration through a selectively permeable membrane.
10. The structure and function of membrane proteins are described as globular proteins that create narrow passageways or channels for molecule transport.
11. The cellular structure that is involved in producing ATP during aerobic respiration is the mitochondrion.
12. The membrane-bound organelles which convert solar energy to chemical energy are? chloroplasts
13. What is the function of the nucleus?
(a) stores DNA
(b) controls most of the cell's processes
(c) contains the information needed to make proteins

Physiology, Environment, and Man Douglas H. K. Lee, David Minard, 2013-09-11 Physiology Environment and Man is based on a symposium conducted by the National Academy of Sciences National Research Council August 1966 While one might expect a textbook to present its field in organized and comprehensive fashion a symposium

necessarily follows more of an illustrative pattern according to the personal interests or even idiosyncrasies of the participants. It is interesting to note that in spite of these limitations the presentations did in fact cover the range of physiological concerns with environmental effects from the genetic to the temporal and from the molecular to the holistic. The book opens with a discussion of the National Academy of Sciences National Research Council's broad based critical study of the physiological underpinning of current concepts of biological responses to toxic chemicals and physical stresses. Subsequent chapters deal with topics such as the metabolic fate of common environmental agents, growth and trophic factors in carcinogenesis, environmental factors in aging and mortality, adaptation to heat and cold, and the definition of an optimum environment.

Study Guide and Workbook, an Interactive Approach for Starr and McMillan's Human Biology, Third Edition Jane B. Taylor, John D. Jackson, 1999. Asks the student to write all answers in this study guide workbook. This workbook is interactive because it requires students to do things instead of just read more material. All questions are arranged by chapter modules so students may skip unassigned material. Each module in the study guide refers to the page numbers of the corresponding module in the text. There is a wide variety of questions: multiple choice questions, tables to be filled in, art to be labeled, true/false questions requiring students to write the correct answer if the statement is false, thought provoking conceptual questions, boldfaced terms requiring a written definition, list of objectives to fill in the blank format, and other types of questions.

Dragonflies and Damselflies Alex Córdoba-Aguilar, 2008-08-28. This book provides a critical summary of the major advances in insect ecology and evolution, discussing the advantages of using dragonflies as model organisms for studies in such areas.
