Modern Engineering Physics Vasudeva:

Concepts of Modern Engineering Physics A S Vasudeva, 2007 Although Concepts of Modern Physics was the first book covering the syllabi of Punjab Technical University Jalandhar and it was accepted wholeheartedly by students and teachers alike. However, due to the repeated changes of syllabi of P T U as it being a new university, the book had to be revised and some of the chapters became redundant as these were replaced by new topics. Though the book was revised with the additional chapters, the discarded chapters also formed the part of the book. **A Textbook of Engineering Physics (Kerala)** A S Vasudeva, 2008 Interference Diffraction Polarization Lasers Fibreoptics Simple Harmonic Motion Wave Motion Ultrasonics And Acoustics X Rays Electronic configuration General Properties Of The Nucleus Nuclear Models Natural Radioactivity Nuclear reactions And Artificial Radioactivity Nuclear Fission And fusion Crystal Structure Band Theory Of Solids Metals Insulators And Semiconductors Magnetic And dielectric Properties Of Materials Maxwell's Equations Matter Waves And Uncertainty Principle Quantum theory Super Conductivity Statistics And Distribution laws Scalar And Vector Fields *Modern Engineering Physics* A S Vasudeva, 2012-07 The book in its present form is due to my interaction with the students for quite a long time. It had been my long cherished desire to write a book covering most of the topics that form the syllabi of the Engineering and Science students at the degree level. Many students although able to understand the various topics of the books may not be able to put their knowledge to use. For this purpose a number of questions and problems are given at the end of each chapter. **Atomic Physics** SN Ghoshal, 2007 the book has been revised to include the postgraduate physics syllabi of Indian Universities in addition to the undergraduate honours syllabi covered in the previous edition. Apart from the new addition made in the existing chapters have been added in this edition to deal with the quantum mechanical theories of atomic and molecular structure. **Tribology in Industries** Srivastava, Sushil Kumar, 2004-08 A Textbook cum reference book for Undergraduate Graduate and Postgraduate students of Mechanical Electrical Maintenance and Production Engineering disciplines. This book would also be of immense help to various practising engineers technologists managers and supervisors engaged in the maintenance operation and upkeep of the different machines equipments systems and plants of various industries. **A Textbook of Workshop Technology** RS Khurmi | JK Gupta, 2008 A Textbook of workshop Technology Manufacturing Processes to the students of degree and diploma of all the Indian and foreign universities. The object of this book is to present the subject matter in a most concise compact to the point and lucid manner. While writing the book we have constantly kept in mind the various requirements of the students. No effort has been spared to enrich the book with simple language and self explanatory diagrams. Every care has been taken not to make the book voluminous as the students have also to face other subjects of equal importance. **Applied Physics II | AICTE Prescribed Textbook - English** Hussain Jeevakhan, 2021-11-01 1 Applied Physics II With Lab Manual by Hussain Jeevakhan 789391505578 DIP126EN Applied Physics II is a basic science course in the first year of the Diploma program in Engineering Technology.
