

Work Safety

Although an automobile presents many hazards, common sense and good equipment can help ensure safety. Many accidents happen because of carelessness. Pay attention and stick to these few important safety rules.

WARNING —

- Never run the engine in the work area unless it is well-ventilated. The exhaust should be vented to the outside. Carbon Monoxide (CO) in the exhaust kills.
- Remove all neckties, scarfs, loose clothing, or jewelry when working near running engines or power tools. Tuck in shirts. Tie long hair and secure it under a cap. Severe injury can result from these things being caught in rotating parts.
- Remove rings, watches, and bracelets. Aside from the dangers of moving parts, metallic jewelry conducts electricity and may cause shorts, sparks, burns, or damage to the electrical system when accidentally contacting the battery or other electrical terminals.
- Disconnect the battery negative (-) cable whenever working on or near the fuel system, airbag system or anything that is electrically powered. Accidental electrical contact may damage the electrical system, cause fire, or result in serious personal injury.
- Never work under a lifted car unless it is solidly supported on jack stands that are intended for that purpose. Do not support a car on cinder blocks, bricks, or other objects that may shift or crumble under continuous load. Never work under a car that is supported only by a jack.
- The fuel system retains pressure even when the ignition is off. Loosen the fuel lines very slowly to allow the residual pressure to dissipate gradually. Avoid spraying fuel.
- Fuel is highly flammable. When working around fuel, do not smoke or work near fire hazards. Keep an approved fire extinguisher handy.
- Illuminate the work area adequately and safely. Use a portable safety light for working inside or under the car. A fluorescent type light is best because it gives off less heat. If using a light with a normal incandescent bulb, use rough service bulbs to avoid breakage. The hot filament of an accidentally broken bulb can ignite spilled fuel or oil.
- Keep sparks, lit matches, and open flame away from the top of the battery. Hydrogen gas emitted by the battery is highly flammable. Any nearby source of ignition may cause the battery to explode.
- Never lay tools or parts in the engine compartment or on top of the battery. They may fall and be difficult to retrieve, become caught in belts or other rotating parts, or cause electrical shorts and damage to the electrical system.

IDENTIFICATION PLATES AND LABELS

Vehicle Identification Number (VIN)

The vehicle year and model can be determined from the VIN or the identification plate. Because stickers can fall off, be painted over, or be moved, it is best to rely on numbers stamped into the chassis.

The VIN (Chassis number) is stamped into the rear cross panel of the engine compartment. It is visible through a window in the plenum chamber cover. See Fig. 1. The identification plate is located on the driver's side of the padded dash panel. Additional vehicle identification information is also found on stickers attached to the driver's side door post and in the trunk.

NOTE —

Additional information on the 17 digit VIN is given in the Foreword on page vi, at the front of the manual.

Fig. 1. Partial vehicle identification number (A) stamped into rear cross panel of the engine compartment. Full VIN on plate on driver's side of padded dash panel.

Engine code and engine number

The engines used in the Volkswagens covered by this manual are identified by a three-letter code. The engine code and the engine number are located on the engine block. Location depends on engine application.

Engine codes

• ACC	1.8 Liter gas
• AAZ, AHU	1.9 Liter diesel
• ABA	2.0 Liter gas
• AAA	2.8 Liter gas
