Paper Modelling (Yesterday's Classics) Mildred Swannell,2021-09-28 An introduction to a handicraft for young children that strengthens skills of paper folding paper cutting and pasting and ruler drawing while constructing models from paper Plans for 44 models are included in the book some simpler and others more complex The first ten models start with a square piece of paper to form simple objects such as a box and a basket or more complex ones such as a cart or a barn Next come 23 models that begin as oblongs and a final 11 from various irregular shapes Detailed instructions accompany the plans Rather than a series of projects to be worked through from beginning to end consider starting with projects with a few simple pieces and few instructions and then as skills increase choosing projects that match your skill level and catch your fancy This edition differs from the original in having each model on its own page or pagespread with instructions for each component placed as closely as possible to its graphic representation The dimensions on the plans match the dimensions in the instructions and are sized to be easily readable The components in each plan are represented as large as possible on the page while still in proportion to each other so the dimensions on the plans will seldom match the measurements on your ruler **Paper**
