The 1840 translation of the Gospel of Luke as a technology of power Itumeleng D. Mothoagae, 2024-07-26 In this book the author aims to explore the impact of 19th century translations of the Bible into indigenous languages with a specific focus on the Setswana translation The translations have had a profound effect on the religious cultural practices of the indigenous people leading to erosion and alteration of their traditions and identities I argue that it is crucial to consider the translator's

intentions and the associated literature such as journals and letters to understand the translation process comprehensively The Setswana Bible was the first to be translated in Africa and tracing the intentions of Robert Moffat the first translator is imperative to understanding the impact of the translation on the receptor culture The methodology adopted is interdisciplinary drawing from linguistics African languages history English literature cultural studies black studies and theology I analyse the impact of the 1840 Gospel of Luke in the context of Setswana culture in South Africa and my findings demonstrate that translations cannot be distinct from the translator To gain a deep understanding of the implications of such texts I adopt a methodology that analyses significant historical literature and primary sources including the records and works of The British and Foreign Bible Society The History of the London Missionary Society and the journals letters and writings of missionaries such as Robert Moffat and John Campbell

Training for the New Millennium Martha Tennent, 2005-01-01 Originating at an international forum held at the University of Vic Spain the twelve essays collected here attest to important changes in translation practice and the assumptions which underpin them Leading theorists respond to the state of Translation Studies today particularly the epistemological dilemma between theories that are empirically oriented and those that are inspired by developments in Cultural Studies But the volume is also practical Experienced instructors survey existing pedagogies at translator interpreter training programs and explore new techniques that address the technological and global challenges of the new millennium Among the topics considered are how to use translation technology in the classroom how to construct a syllabus for a course in audiovisual translating or in translation theory and how to develop guidelines for a program for community interpreters or conference interpreters The contributors all assume that translation whether written or oral does not occupy a neutral space It is a cross cultural exchange that produces far reaching social effects Their essays significantly advance the theoretical and practical understanding of translation along these lines
