Audiovisual Translation Frederic Chaume, 2020-11-29 *Audiovisual Translation Dubbing* is an introductory textbook that provides a solid overview of the world of dubbing and is fundamentally interactive in approach. Based on first hand experience in the field, the book combines translation practice with other related tasks usually commissioned to dialogue writers and dubbing assistants, thus offering a complete introduction to the field of dubbing. It develops diversified skills, presents a broad picture of the industry, engages with the various controversies in the field and challenges prevailing stereotypes. The individual chapters cover the map of dubbing in the world, the dubbing market and professional environment, text segmentation into takes or loops, lip syncing, the challenge of emulating oral discourse, the semiotic nature of audiovisual texts and specific audiovisual translation issues. The book further raises a number of research questions and looks at some of the unresolved challenges of this very specific form of translation. It includes graded exercises covering core skills that can be practised in class or at home individually or collectively.

El resumen automático y la evaluación de traducciones en el contexto de la traducción especializada María Cristina Toledo Báez, 2010. La obra analiza de una parte el resumen automático como nueva tecnología de la traducción y de otra la evaluación analítica y holística de traducciones. El objetivo principal es demostrar mediante estudios empíricos con traductores semiprofesionales que el resumen automático en concreto, el programa Term Based Summariser (TBS), facilita la traducción en ambos sentidos, directa e inversa, de textos especializados artísticos de investigación del ámbito jurídico tecnológico en tres lenguas de trabajo: español, inglés y francés. Los resultados obtenidos se han comprobado por un lado con criterios cuantitativos, principalmente mediante la evaluación de traducciones con nuestras propias plantillas analíticas y holísticas, y por otro lado con criterios cualitativos empleando encuestas electrónicas como herramientas. En todos ellos, las traducciones realizadas con ayuda del programa TBS han obtenido mejores resultados que las traducciones llevadas a cabo sin dicho programa, lo cual corrobora que el resumen automático constituye una ayuda documental y terminológica significativa para los traductores.
