Artefacts, Archives, and Documentation in the Relational Museum Mike Jones, 2021-07-14 Artefacts Archives and Documentation in the Relational Museum provides the first interdisciplinary study of the digital documentation of artefacts and archives in contemporary museums while also exploring the implications of polyphonic relational thinking on collections documentation Drawing on case studies from Australia the United Kingdom and the United States the book provides a critical examination of the history of collections management and documentation since the introduction of computers to museums in the 1960s demonstrating how technology has contributed to the disconnection of distributed collections knowledge Jones also highlights how separate documentation systems have developed managed by distinct increasingly professionalised staff impacting our ability to understand and use what we find in museums and their ever expanding online collections Exploring this legacy allows us to rethink current practice focusing less on individual objects and more on the rich stories and interconnected resources that lie at the heart of the contemporary plural participatory relational museum Artefacts Archives

and Documentation in the Relational Museum is essential reading for those who wish to better understand the institutional silos found in museums and the changes required to make museum knowledge more accessible The book is a particularly important addition to the fields of museum studies archival science information management and the history of cultural heritage technologies

Havana Syndrome Armin Krishnan,2025-09-04 Havana Syndrome is most likely caused by unknown types of directed energy weapons either of the acoustic or electromagnetic variety The technology for such weapons has been under development since at least the 1960s The first covert attacks on U S diplomats may go back to that time when the phenomenon was called the Moscow Signal Havana Syndrome A Threat to National Security covers the history of anti personnel directed energy weapons DEW from the Soviet psychotronic weapons that were rumored to exist since the 1970s to the nonlethal weapons developed in the West in the 1980s onward The book examines the publicly known details of Havana Syndrome and provides some analysis of the U S government investigations into Havana Syndrome with respect to what has been declassified The most likely perpetrators are the Russian or Chinese governments as some incidents seem to be related to their strategic interests and as both would have the technology to carry out such sophisticated attacks Havana Syndrome establishes a connection between the Anomalous Health Incidents and what NATO analysts have termed cognitive warfare to speculate about the true purpose of these mysterious attacks

Orthodox Christians and the Rights Revolution in America A. G. Roeber,2024-01-02 A distinctive and unrivaled examination of North American Eastern Orthodox Christians and their encounter with the rights revolution in a pluralistic American society From the civil rights movement of the 1950s to the culture wars of North America commentators have identified the partisans bent on pursuing different rights claims When religious identity surfaces as a key determinant in how the pursuit of rights occurs both the religious right and liberal believers remain the focus of how each contributes to making rights demands How Orthodox Christians in North America have navigated the rights revolution however remains largely unknown From the disagreements over the rights of the First Peoples of Alaska to arguments about the rights of transgender persons Orthodox Christians have engaged an Anglo American legal and constitutional rights tradition But they see rights claims through the lens of an inherited focus on the dignity of the human person In a pluralistic society and culture Orthodox Christians both converts and those with family roots in Orthodox countries share with non Orthodox fellow citizens the challenge of reconciling conflicting rights claims Those claims do pit religious liberty rights claims against perceived dangers from outside the Orthodox Church But internal disagreements about the rights of clergy and people within the Church accompany the Orthodox Christian engagement with debates over gender sex and marriage as well as expanding political legal and human rights claims Despite their small numbers North American Orthodox remain highly visible and their struggles influential among the more than 280 million Orthodox worldwide Orthodox Christians and the Rights Revolution in America offers an historical analysis of this unfolding story

Science Fraud: Darwin's Plagiarism of Patrick Matthew's Theory Mike Sutton,2023 Patrick Matthew in 1831

originated the complete theory of evolution by natural selection in his book *On Naval Timber and Arboriculture* and did so before Charles Darwin and Alfred Wallace claimed to independently replicate it in 1858. Unjustly and against the Arago convention on priority a ruling that gives origination of any science theory to the first to publish, Matthew has been illicitly denied his priority on the grounds he never influenced anyone with his breakthrough. Today Big Data research has uncovered Darwin's science fraud by plagiarism, revealing evidence which proves beyond all reasonable doubt that he and Alfred Wallace both independently plagiarised the theory of evolution by natural selection from Patrick Matthew. Books have been newly unearthed in the publication record to show that at least 30 people cited Matthew's work in published literature before 1858 and that several were known influencers of Darwin's and Wallace's work in the field. Additionally, several people in Darwin's and Wallace's social circles were first to be second into print using original terms coined by Matthew in his bombshell breakthrough book. This book reveals all the newly unearthed data and essentially explains it alongside the deplorable treatment of Patrick Matthew in scholarly historical context. Dr Mike Sutton further reveals using social science participatory observation methods and experimental results how members of the so-called Darwin Industry enabled and facilitated by the deliberate publication of falsehoods and other grossly misleading editing on Wikipedia have disgracefully worked to re-bury these newly unearthed facts by means of knee-jerk blind sight ignorant rejection, blatant and deliberate fact denial, censorship, persistent and serious workplace harassment, obscene social media abuse, poison pen emails, lies, mischievous misrepresentation and repeat research plagiarism. Sex, Sexuality, Law, and (In)justice Henry F.

Fradella, Jennifer M. Sumner, 2016-02-26 *Sex Sexuality Law and In Justice* covers a wide range of legal issues associated with sexuality, gender, reproduction and identity. These are critical and sensitive issues that law enforcement and other criminal justice professionals need to understand. The book synthesizes the literature across a wide breadth of perspectives, exposing students to law, psychology, criminal justice, sociology, philosophy, history and where relevant biology to critically examine the social control of sex, gender and sexuality across history. Specific federal and state case law and statutes are integrated throughout the book, but the text moves beyond the intersection between law and sexuality to focus just as much on social science as it does on law. This book will be useful in teaching courses in a range of disciplines, especially criminology and criminal justice, history, political science, sociology, women and gender studies and law. *Psychedelic Humanities* Erika

Dyck, Tehseen Noorani, Nicolas Langlitz, Alex Dymock, Anne Katrin Schlag, Oliver Davis, 2024-06-19 *Psychedelics* are part of a resurgence of interest in consciousness studies, especially as altered states of consciousness are being re-examined in the context of psychedelic-assisted therapies. To date, discussions about psychedelics in modern medicine have been dominated by studies in biomedicine. However, given that cultural factors play a significant role in the subjective effects of psychedelics, psychedelics can be considered a uniquely powerful point of convergence between the cultural and biomedical. Writers and artists alongside psychiatrists and pharmacologists have participated in shaping the psychedelic experience by drawing on a

rich set of approaches that blend narrative arts and humanities concepts to explain and interpret psychedelic experiences and explore consciousness for creative purposes Psychedelic studies past and present emphasize the importance of set and setting or the context of psychedelic consumption and its paramount importance in shaping psychedelic experiences These non pharmacological factors rely on a different set of methods and interpretations that necessarily rely on studies conducted outside of the biomedical sciences **Challenges of the Modern Economy** Yakhya G. Buchaev, Arsen S.
