Questions: 5 | Time: 90min | Marks: 80

Question 1

[Maximum mark: 13]

On September 1st, an orchard commences the process of harvesting 36 hectares of apple trees. At the end of September 4th, there were 30 hectares remaining to be harvested, and at the end of September 8th, there were 24 hectares remaining. Assuming that the number of hectares harvested each day is constant, the total number of hectares remaining to be harvested can be described by an arithmetic sequence.

1. Find the number of hectares of apple trees that are harvested each day. [3]
2. Determine the number of hectares remaining to be harvested at the end of September 1st. [1]
3. Determine the date on which the harvest will be complete. [2]

In 2021 the orchard sold their apple crop for \$220 000. It is expected that the selling price will then increase by 3.2% annually for the next 7 years.

4. Determine the amount of money the orchard will earn for their crop in 2026. Round your answer to the nearest dollar. [3]
5.
 1. Find the value of $\sum_{n=1}^8 (220\,000 \times 1.032^{n-1})$. Round your answer to the nearest integer.
 2. Describe, in context, what the value in part (c) (i) represents. [3]
6. Comment on whether it is appropriate to model this situation in terms of a geometric sequence. [1]

Selected Papers of E. B. Dynkin with Commentary Evgeniï Borisovich Dynkin,Gary M. Seitz,2000 Eugene Dynkin is a rare example of a contemporary mathematician who has achieved results in two quite different areas of research algebra and probability In both areas his ideas constitute an essential part of modern mathematical knowledge and form a basis for further development Although his last work in algebra was published in 1955 his contributions continue to influence current research in algebra and in the physics of elementary particles His work in probability is part of both the historical and the modern development of the topic

Guy,1984 **Reviews of Papers in Algebraic and Differential Topology, Topological Groups, and Homological Algebra** Norman Earl Steenrod,1968 *The Common Core in Action* Deborah J. Jesseman,2015-06-19 This book addresses Common Core State Standard curriculum resources to assist the school librarian in collaborating with classroom teachers

Librarians are being asked to understand the Common Core State Standards CCSS and their implications to programming and instruction as well as to collection development planning Using lesson plans originally published in School Library Monthly this title builds upon them adding many additional plans that address CCSS issues The plans will help you

implement the standards and can also be used as stepping stones to facilitate planning conversations and collaboration with teachers to co teach lessons correlated with the standards The book begins with an overview of the CCSS what they are how are they different from the content standards and what the implications are for schools where the state has adopted them including what the CCSS mean for collection development It then goes on to explore the opportunities the CCSS present for the school librarian looking at how you can become a leader in employing the process The majority of the book is devoted to reproducible lesson plans organized by curricular area or topic and grade level for ease of use
