The Global Threat of New and Reemerging Infectious Diseases Jennifer Brower, Peter Chalk, 2003. This study offers a more comprehensive analysis of the security implications of the spread of infectious diseases than has been done to date. The study examines the impact of the HIV/AIDS epidemic in South Africa, highlighting this particular crisis as a graphic example of the devastating effects that infectious disease can have on virtually every aspect of a state's functioning viability. It also makes a detailed analysis of the United States, delineating the threat posed by specific diseases, assessing the effectiveness of the existing public health infrastructure and offering specific actions that can be taken to improve the country's ability to meet this emerging challenge. In a world beset by serious and unconscionable health disparities by dangerous contagions that can circle our globalized planet in hours and by a bewildering confusion of health actors and systems, humankind needs a new vision, a new architecture, new coordination among renewed systems to ensure central health capabilities for all. Global Health Justice and Governance lays out the critical problems facing the world today and offers a new theory of justice and governance as a way to resolve these seemingly intractable issues. A fundamental responsibility of society is to ensure human flourishing. The central role that health plays in flourishing places a unique claim on our public institutions and resources to ensure central health capabilities to reduce premature death and avoid preventable morbidities. Faced with staggering inequalities, imperiling epidemics and inadequate systems, the world desperately needs a new global health architecture. Global Health Justice and Governance lays out this vision. *Current Law Index*, 2005.
