BACK COVER

**The Historical Evolution of International Business** Lilac Nachum, Attila Yaprak, 2025-05-22 This book represents the first and most comprehensive account of the history of International Business IB as a field of study The chronicling of the evolution of IB thought teaching and institutions in a unified framework serves to observe the interdependencies among these components and demonstrates the ways by which they have jointly shaped IB as a field of study The book is based on vast volumes of original material whose discussion and interpretation by leading IB scholars creates a dialogue between historical perspectives and contemporary developments and shows the critical role of history in understanding the current state and discourse of IB as a field of study The book situates the history of IB within the broader context of business political and societal developments

and examines the interaction between external and internal forces as they have shaped the field's growth trajectory both on its own and in comparison with those of other fields of study     International Business Research Lee Charles Nehrt, J. Frederick Truitt, Richard W. Wright, 1970 Annotated bibliography of publications relating to research into the organisation and operations of multinational enterprise issued from 1950 to 1967 and of research in progress lists recommendations for future research projects based on the use of delphi technique developed by the Rand Corporation     Journal of Business Research , 1988     Rethinking the Case Study in International Business and Management Research Rebecca Marschan-Piekkari, Catherine Welch, 2011-01-01 This important and original book places the case study in international business research in its historical context critically evaluates current case study practices in the field and proposes a more pluralistic future for case research within international business and international management research While the case study is the most popular qualitative research strategy in the field only a narrow selection of possible approaches is currently used IB and IM researchers typically rely on a case study approach that could be characterized as qualitative positivism The editors and contributors look beyond this disciplinary convention and encourage greater pluralism in IB and IM case research Their key argument is that increased awareness of prevailing disciplinary conventions and their limitations increases the potential for methodological innovation and versatility in case research The contributions provide critical novel and innovative perspectives on the case study in IB and IM research The book offers inspiration to case authors and an authoritative methodological reference for those publishing and reviewing case research It will also be highly regarded by postgraduate and doctoral students in IB and IM as well as both qualitative and quantitative researchers in the field

*Location of International Business Activities* Academy of International Business ., 2014-12-02 In recent years an extensive range of new research has been revisiting the topic of the location of international business activities from a variety of different perspectives and background interests This work has been inspired in part by two apparently quite different but actually related contemporary trends on the one hand an emergence or revitalization of clusters of activities co located in or around selected global city regions or fast growing metropolitan areas and on the other hand an increased global dispersion of activities conducted within the value chains managed or coordinated by many large multinational enterprises and their business partners The former trend has given rise to discussions of how the elite of the cultural cognitive economy of the 21st century in Allen Scott's terminology or the creative class Richard Florida's term are now being drawn or brought back to major urban centers while the latter trend is associated with debates over outsourcing and the economic and social consequences of shifts in the ownership and location of distinct nodes of value chains once production systems become more fragmented and the component parts of such systems become more geographically dispersed An increased interest in the subject of international business location has been shown by scholars in Strategic Management in Economic Geography and in Regional Science as well as in our own interdisciplinary field of International Business Studies However as is often the

case in academic research communities these bodies of scholarship have tended to develop at something of a distance from one another each conversing internally more than they have with one another Location of International Business Activities aims to promote a greater conversation between those interested in the topic of Location from various different backgrounds or starting points The articles are taken from a special issue on the theme of the Multinational in Geographic Space which was published by The Journal of International Business Studies in 2013

*A Research Agenda for International Entrepreneurship* Christian Felzensztein, Sascha Fuerst, 2023-12-11 Addressing the intersection between the fields of international business and entrepreneurship this topical Research Agenda wholly encapsulates the multi dimensional nature of international entrepreneurship It provides essential insight into themes for future research alongside their practical implications
