Good Faith in Transnational Law Frédéric Gilles Sourgens, 2022-09-12 Transnational law currently appears fragmented and captured by self interested corporate actors Good faith is at the heart of this fragmentation To defend transnational law thus requires an account of good faith Good Faith in Transnational Law explains and recasts fragmentation and capture as something valuable and casts good faith as an obligation of other regarding communicative conduct Frédéric Gilles Sourgens argues that the fragmentation we experience is a virtue for communication across vastly different commercial economic social cultural and linguistic contexts to remain legally meaningful we must translate our different expectations into a shared context bound idiom He argues that law harnesses stress of such translations through stress fields that reintegrate the different experiences in a shared transnational discourse

Hegemonic Transitions, the State and Crisis in Neoliberal Capitalism Yildiz Atasoy, 2009-01-08 More than 15 years have passed since the end of the Cold War but uncertainty persists in the political economic shaping of the world economy and state system Although many countries have institutionalized neoliberal policies since the mid 1970s these policies have not taken hold to the same degree nor have their effects been uniform across all countries Nevertheless there has been widespread deepening of inequalities and therefore scepticism towards the neoliberal project Uncertainty prevails not only in the relations between states but also in the relations between forces of capital citizens and political power within states Moreover there is conceptual confusion in our understanding of the events and processes of neoliberal global transformation This collection of essays provides a comprehensive theoretical and empirical examination of neoliberal restructuring as a complex political process In an effort to penetrate and clarify this complexity the book explores the connections between the economy state society and citizens while also offering current examples of resistance to neoliberalism The book provides a forum for rethinking politics that represents a turn to societal forces as essential not only to the uncovering of this complexity but also to the formulation of democratic possibilities beyond global hegemonic projects The book does not seek to produce a new model for social change nor does it dwell on the spatial aspects of modernity's new form or the emergence of a new state hegemony China or new forms of rule empire in managing the world capitalist economy Instead the book argues that an understanding of hegemonic transformations requires the problematization of global power as embedded in historically specific social relations
