## **Journal Impact Factors 23:**

**Issues in Critical and Emergency Medicine: 2013 Edition** ,2013-05-01 Issues in Critical and Emergency Medicine 2013 Edition is a ScholarlyEditions book that delivers timely authoritative and comprehensive information about Injury Research The editors have built Issues in Critical and Emergency Medicine 2013 Edition on the vast information databases of ScholarlyNews You can expect the information about Injury Research in this book to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Issues in Critical and Emergency Medicine 2013 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com> Principles of Scientific Writing and Biomedical Publication Phil B. Fontanarosa,Annette Flanagan,Philip Greenland,2024 Publication of biomedical research is essential for improvement and advancement of medical science and clinical practice The history of scientific publication including journals devoted to medical science dates to the 1600s The number of peer reviewed scientific journals is estimated to be in the tens of thousands and the number of journals especially with the increasing creation of open access publications continues to expand Yet despite the long history of and ubiquitous nature of scientific publications the core principles involved in biomedical publication as well as the specific skills of writing and manuscript preparation are not commonly taught in a formal or comprehensive way in medicine public health or research curricula Provided by publisher Cumulated Index Medicus ,1999 **Springer Handbook of Science and Technology Indicators** Wolfgang Glänzel,Henk F. Moed,Ulrich Schmoch,Mike Thelwall,2019-10-30 This handbook presents the state of the art of quantitative methods and models to understand and assess the science and technology system Focusing on various aspects of the development and application of indicators derived from data on scholarly publications patents and electronic communications the individual chapters written by leading experts discuss theoretical and methodological issues illustrate applications highlight their policy context and relevance and point to future research directions A substantial portion of the book is dedicated to detailed descriptions and analyses of data sources presenting both traditional and advanced approaches It addresses the main bibliographic metrics and indexes such as the journal impact factor and the h index as well as altmetric and webometric indicators and science mapping techniques on different levels of aggregation and in the context of their value for the assessment of research performance as well as their impact on research policy and society It also presents and critically discusses various national research evaluation systems Complementing the sections reflecting on the science system the technology section includes multiple chapters that explain different aspects of patent statistics patent classification and database search methods to retrieve patent related information In addition it examines the relevance of

trademarks and standards as additional technological indicators The Springer Handbook of Science and Technology Indicators is an invaluable resource for practitioners scientists and policy makers wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and research performance **Science**

**Dynamics and Research Production** Nikolay K. Vitanov, 2016-08-01 This book deals with methods to evaluate scientific productivity In the book statistical methods deterministic and stochastic models and numerous indexes are discussed that will help the reader to understand the nonlinear science dynamics and to be able to develop or construct systems for appropriate evaluation of research productivity and management of research groups and organizations The dynamics of science structures and systems is complex and the evaluation of research productivity requires a combination of qualitative and quantitative methods and measures The book has three parts The first part is devoted to mathematical models describing the importance of science for economic growth and systems for the evaluation of research organizations of different size The second part contains descriptions and discussions of numerous indexes for the evaluation of the productivity of researchers and groups of researchers of different size up to the comparison of research productivities of research communities of nations Part three contains discussions of non Gaussian laws connected to scientific productivity and presents various deterministic and stochastic models of science dynamics and research productivity The book shows that many famous fat tail distributions as well as many deterministic and stochastic models and processes which are well known from physics theory of extreme events or population dynamics occur also in the description of dynamics of scientific systems and in the description of the characteristics of research productivity This is not a surprise as scientific systems are nonlinear open and dissipative

Index Medicus ,2002 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings Management of Serials in Libraries Thomas Nisonger, 1998-10-15 Focusing on the management of serials in libraries and the role of serials in scholarly communications this book combines descriptive and prescriptive approaches to illuminate major serials management issues Unlike other works on the subject this text emphasizes collection management issues serials evaluation selection criteria cancellation weeding document delivery budgeting decision models use studies journal ranking and the application of citation analysis including use of the Journal Citation Reports and Bradfordian distribution The author also discusses the implications of the Internet and World Wide Web for serials management Other topics include types of serials serials history serials automation electronic journals technical services processing and copyright issues Appendixes list and annotate relevant World Wide Web sites pertinent bibliographies and sources of statistical data about serials Significant research is often cited There are extensive footnotes and bibl **Encyclopedia of Forensic and Legal Medicine**
