

My Personal Philosophy Of Education

As a student at Mercy College and an upcoming Teacher, what is important to me is fully gaining knowledge from my education that will prepare me to be the best possible teacher. Being a student can be very tough in many ways. Handling the work workload that is given to us, the number of essays we have to write, and the homework assignments we have to do can bring a lot of tension stress and painful headaches. One thing I learned from the college experience that is going to stick with me for life is that the workload can be very hard to handle, but after it's done and I gain knowledge, I will feel very blessed and very happy with the amount of work that I did. Honestly speaking, that is the best thing I have learned as a student. Doing all the work and gaining knowledge and using that in my everyday life is a privilege. Not all people get to go to school or get to go to college and learn subjects or gain knowledge from teachers or from some of the best professors that the school has to offer. Also, it's very important for us as students to build a connection with our professors and show them every student in the classroom wants to learn from them and wants to be as successful as they can. In my opinion, professors are some of the best people out there; if we really think about it, it is professors who are the reason each year young people like me and other college students from all over the world are graduating and going on to do the jobs that they love. Professors are the reason why people in the world are so successful and knowledgeable, and it honestly hurts me to say that they don't get enough recognition or not enough respect or all the love that they deserve. It is very important for professors to feel the connection with their students and treat them as daughters and sons that they want to see succeed. It is also very important for professors to make sure their students get the education that they need to be successful in life.

My Philosophy Of Education Paper:

Jesse Stuart On Education J.R. LeMaster, 2014-07-15 Could a man who never earned a master's degree tell the nation's teachers and administrators how to run their schools? Jesse Stuart, who had a life-long love of education, did just that. From Stuart's autobiographical works, J.R. LeMaster has chosen selections that demonstrate his philosophy of learning and teaching and his philosophy of life. The selections establish a loose chronology of events in Stuart's lifelong education and describe his experience as preschooler, student, teacher, and school administrator. This multiple perspective, LeMaster suggests, is essential to understanding the process we call education: a process Jesse Stuart located in nature, believing that human beings are first and foremost natural beings and only incidentally cultural beings. That is, while we belong to an order of human beings, we also belong to a larger order, a universe of living things. In his general introduction, LeMaster discusses Stuart's life and philosophy, providing the reader with a backdrop against which to study selections from *Beyond Dark Hills*, *The Thread That Runs So True*, *The Year of My Rebirth*, *God's Oddling*, *Mr. Gallion's School*, *To Teach To Love*, and other Stuart works. Each excerpt is illumined by LeMaster's discussion of its place in Stuart's philosophy of education. Those concerned with the apparent breakdown of the American educational system will find much to consider in LeMaster's discussion of the implications of Stuart's views on education. He contends that the present crisis in our schools stems from an inadequate philosophy for living and that Jesse Stuart, who believed education was a natural development, knew as much all along.

The Dream and the Reality of Teaching Keen J. Babbage, 2011-05-05 The dream of teaching is that it's fascinating, meaningful, inspiring, and rewarding. The reality of teaching is that it can be exhausting, frustrating, heart-breaking, and disappointing. This book guides prospective teachers through an analysis of the profession they are considering and of their match with that profession and leads current teachers through an analysis of their career achievements, progress, challenges, and goals.

The Road Traveled and Other Essays Steven M. Cahn, 2018-12-26 *The Road Traveled and Other Essays* presents the recent work of philosopher and educator Steven M. Cahn. This book offers his latest reflections on the nature of well-being, the rationality of religious belief, and the aims of higher education. Also included are a selection of his challenging philosophical puzzles. The work concludes with a detailed account of his career as a faculty member, foundation executive, and university administrator.

Teaching Philosophy Statement Umar Aliyu,2019-08-19 I am delighted to write this book because teachers play a very vital and important role in our life A good teacher helps us to become good human beings and citizens in our society and the country as a whole Teachers know that students are the future of any nation so the future development of any nation is in the hands of teachers There is a core belief behind every educator which is teachers are known to be simply amazing Teachers inspire people because they impact knowledge and add value to their students lives and overall these individuals understand the sacrifice and dedication one must make in order to be successful in the lives they touch The most common role a teacher plays in the classroom is to teach knowledge to children and let us always have it in the back of our minds that it is only In learning you will teach and in teaching you will learn The most important role of a teacher is to deliver classroom instruction that helps students by ensuring that students experience academic success and through functioning as surrogate parents mentors and counsellors and even almost politicians since there is almost no limit to the roles a teacher will play Teachers teach in many ways including lectures small group activities and hands on learning activities Therefore to achieve all this there must be some laid

down principles that must be followed in order to fully impact the students positively and overall achieve growth and development in the education industry A typical practice for instructors is to build up a showing logic which causes them to become intelligent specialists all through time on different educating and learning methodologies A teaching philosophy statement is a narrative that includes your conception of teaching and learning a description of how you teach and justification for why you teach in a particular way In other words your teaching philosophy is a self reflective statement of your beliefs about teaching and learning It is a one to two page narrative which conveys your core ideas about being an effective teacher in the context of your discipline The thrust of the paper is to critically analyse what is teaching philosophy and its importance to teachers and the educational sector as a whole This book will help starting and experienced instructors to improve their teaching abilities by building methods insight and a formative procedure concentrated on the upgrade for learning According to Aristotle Those who know do while those that understand teach I also firmly believe that the most vital and important thing in the world is teaching because the best thing a person can achieve in life is to learn something because it is virtually the only thing which the mind can never overlook never use up completely never feel isolated or estranged and will never let you down This is why Teaching Philosophy is very important to teachers because it enables them to understand the scope and limits of empirical research in education and the relationships between that research and conceptual issues in education thereby making them view and analyse from the perspective of their students Finally apart from understanding why students are behaving in a particular way with Teaching Philosophy teachers would also be able to know how students perceive their actions As a model in teaching in High school Colleges or Universities this book peels back the layers of those conceptual issues in teaching worlds and reveals many surprising findings that will impact you positively because this book has it all If you have found this book useful please consider leaving a short review on Amazon
