Matlab Symbolic Algebra And Calculus Tools:

MATLAB Symbolic Algebra and Calculus Tools Cesar Lopez, 2014-12-19 MATLAB is a high level language and environment for numerical computation visualization and programming Using MATLAB you can analyze data develop algorithms and create models and applications The language tools and built in math functions enable you to explore multiple approaches and reach a solution faster than with spreadsheets or traditional programming languages such as C C or Java MATLAB Symbolic Algebra and Calculus Tools introduces you to the MATLAB language with practical hands on instructions and results allowing you to quickly achieve your goals Starting with a look at symbolic variables and functions you will learn how to solve equations in MATLAB both symbolically and numerically and how to simplify the results Extensive coverage of polynomial solutions inequalities and systems of equations are covered in detail You will see how MATLAB incorporates vector matrix and character variables and functions thereof MATLAB is a powerful symbolic manipulator which enables you to factorize expand and simplify complex algebraic expressions over all common fields including over finite fields and algebraic field extensions of the rational numbers With MATLAB you can also work with ease in matrix algebra making use of commands which allow you to find eigenvalues eigenvectors determinants norms and various matrix decompositions among many other features Lastly you will see how you can use MATLAB to explore mathematical analysis finding limits of sequences and functions sums of series integrals derivatives and solving differential equation [NASA Tech Briefs](#) ,1994

[The Student Edition of MATLAB](#) Duane C. Hanselman, MathWorks, Inc, 1995 This text examines the Version 4 of MATLAB software for numerical computations and problem solving which incorporates changes integrated into the MATLAB professional release 4 including new 3 D colour scientific visualization new object oriented graphics and graphical user interface tools *Digital Signal Processing in Power Electronics Control Circuits* Krzysztof Sozański, 2017-05-10 This revised and extended second edition covers problems concerning the design and realization of digital control algorithms for power electronics circuits using digital signal processing DSP methods This book discusses signal processing starting from analog signal acquisition through conversion to digital form methods of filtration and separation and ending with pulse control of output power transistors The book is focused on two applications for the considered methods of digital signal processing a three phase shunt active power filter and a digital class D audio power amplifier The book bridges the gap between power electronics and digital signal processing Many control algorithms and circuits for power electronics in the current literature are described using analog transmittances This may not always be acceptable especially if half of the sampling frequencies and half of the power transistor switching frequencies are close to the band of interest Therefore in this book a digital circuit is treated as a digital circuit with its own peculiar characteristics rather than an analog circuit This helps to avoid errors and instability This edition includes a new chapter dealing with selected problems of simulation of power electronics systems together with digital control circuits The book includes numerous examples using MATLAB and PSIM programs [Symbolic](#)

Mathematics with MATLAB Using MuPAD. Calculus and Linear Algebra Smith A.,2016-11-27 MATLAB Symbolic Math Toolbox uses the MuPAD language as part of its underlying computational engine The language has an extensive set of functions that are optimized for creating and operating on symbolic math expressions Mupad is a GUI driven MATLAB package that helps you do algebra calculus as well as to graph and visualize functions As you know MATLAB is good for writing simple programs and working with numbers but is cumbersome for doing symbolic calculations In contrast Mupad works with symbols by default and has a nice menu driven interface This book develops Linear Algebra and Calculus topics

MATLAB for Engineers Holly Moore,2009 MATLAB for Engineers 2e is ideal for Freshman or Introductory courses in Engineering and Computer Science With a hands on approach and focus on problem solving this introduction to the powerful MATLAB computing language is designed for students with only a basic college algebra background Numerous examples are drawn from a range of engineering disciplines demonstrating MATLAB's applications to a broad variety of problems Note This book is included in Prentice Hall's ESource series ESource allows professors to select the content appropriate for their freshman first year engineering course Professors can adopt the published manuals as is or use ESource's website www.prenhall.com/esource to view and select the chapters they need in the sequence they want The option to add their own material or copyrighted material from other publishers also exists

Mathematics With Matlab. Symbolic Calculus H. Mendel,2017-08-13 MATLAB provides functions for solving plotting and manipulating symbolic math equations You can create run and share symbolic math code using the MATLAB Live Editor The Symbolic Math Toolbox provides libraries of functions in common mathematical areas such as calculus linear algebra algebraic and ordinary differential equations equation simplification and equation manipulation Symbolic Math Toolbox lets you analytically perform differentiation integration simplification transforms and equation solving Your computations can be performed either analytically or using variable precision arithmetic with the results displayed in mathematical typeset You can share your symbolic work as live scripts with other MATLAB users or convert them to HTML or PDF for publication You can generate MATLAB functions Simulink's function blocks and Simscape's equations directly from symbolic expressions The toolbox allows to work essentially on the following topics Symbolic integration differentiation transforms and linear algebra Algebraic and ordinary differential equation ODE solvers Simplification and manipulation of symbolic expressions Plotting of analytical functions in 2D and 3D Code generation from symbolic expressions for MATLAB Simulink Simscape C Fortran and LaTeX Variable precision arithmetic MuPAD for Symbolic Math calculus On the other hand MuPAD engine is a separate process that runs on your computer in addition to a MATLAB process A MuPAD engine starts when you first call a function that needs a symbolic engine such as syms Symbolic Math Toolbox functions that use the symbolic engine use standard MATLAB syntax
