**The Political Economy of City Branding** Ari-Veikko Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways One of its manifestations is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship information expertise and consumption This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets the latter including a naturally evolving reputation or consciously developed competitive identity or brand The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North America Europe East Asia and Australasia Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities characteristics and positions in the global urban hierarchy On top of this social and urban challenges such as creative class struggle are also discussed The core

message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results This book will be of interest to scholars and practitioners working in the areas of local economic development urban planning public management and branding

**Adopting a Harmonized Regional Approach to Customs Regulation for the Tripartite Free Trade Agreement** Vimbai Lisa Michelle Jana,2017-09-19 The three regional economic communities RECs in Eastern and Southern Africa are the Common Market for Eastern and Southern Africa COMESA the East African Community EAC and the Southern African Development Community SADC Together they have recognised the need to work towards regional cooperation aimed at the eventual creation of a single regional economic community or Tripartite Free Trade Agreement TFTA This will replace the existent RECs in Eastern and Southern Africa to which the member states of these two regions have multiple membership The TFTA region comprises a total of 27 member states which have a combined population of 527 million people and a combined gross domestic product GDP of USD 624 billion These statistics translate into a potential regional economic powerhouse for Eastern and Southern Africa One of the major goals of the TFTA is to harmonise trade arrangements among the three RECs improve the movement of goods and persons within the single integrated region facilitate the joint implementation of regional infrastructure projects and enhance co operation of member states This is a laudable initiative by the member states of the three RECs and it is recognised that regional integration is the first step towards integration into a multilateral trading system For the TFTA member states it is crucial that there is an awareness to move towards a review of domestic customs legislation and policy and to develop regional supranational legislation and regulations in order to gain a stronger competitive edge in the global market This study shies away from proposing a quick fix or instant benefit to the harmonisation of TFTA member states customs legislative frameworks and policies and the development of a single automated interoperable electronic customs system Rather it places its focus on long term sustainable benefits which will be realised over time The harmonisation of TFTA member state customs legislative policies and the resultant Information and Communications Technology ICT reforms to the customs processes of the TFTA member states though not immediate or short term will strategically position the region to conduct business in an increasingly volume driven fast paced electronic global economy

Cima, 2016-10-14 This volume examines the range of Non Trade Concerns NTCs that may conflict with international economic rules and proposes ways to protect them within international law and international economic law Globalization without local concerns can endanger relevant issues such as good governance human rights right to water right to food social economic cultural and environmental rights labor rights access to knowledge public health social welfare consumer interests and animal welfare climate change energy environmental protection and sustainable development product safety food safety and security Focusing on China the book shows the current trends of Chinese law and policy towards international standards The authors argue that China can play a leading role in this context not only has China adopted several reforms and new regulations to address NTCs but it has started to play a very relevant role in international negotiations on NTCs such as climate change energy and culture among others While China is still considered a developing country in particular from the NTCs point of view it promises to be a key actor in international law in general and more specifically in international economic law in this respect This volume assesses taking into consideration its special context China's behavior internally and externally to understand its role and influence in shaping NTCs in the context of international economic law **The State of African Cities, 2014** United Nations Human Settlements Programme, 2013 Nairobi UN

Habitat c2014 9789211325980      **The State of African Cities, 2014** United Nations Publications,2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa s economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change      "Code of Massachusetts regulations, 2013" ,2013 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020      **Selected Monthly Economic Indicators** Burma. about factors that led to the Arab uprisings and the difficult transitions to democracy that followed the departure of long standing dictators by marking elements influencing middle class allegiances specifically those that weakened their well established alliances with ruling regimes The report is motivated by the conviction on the basis of past development experiences that a new Arab development model can only succeed if the middle class plays a lead role in designing and implementing processes of economic transformation and political transition Studying the middle class is therefore crucial to interpreting the past understanding the present and reading the potential future development prospects of the Arab region This report introduces three novel approaches aimed at charting a path for sustaining empowering and enlarging the middle class The first is related to the measurement of the middle class based on a definition that takes into account both the quantity and quality of their consumption expenditure The second relates to the profiling of the Arab middle class using variables such as education employment and mobility in addition to multidimensional poverty The third novel approach lies in using these results to provide a narrative of the socioeconomic context of the decade leading up to the uprisings from a middle class perspective The report concludes that the empowerment of the Arab middle class could pave a way out of the current development and governance debacle towards an Arab developmental State Publisher s description *A Treatise on the Anti-trust Laws of the United States* Harry Aubrey Toulmin (Jr.),1949 OECD Employment Outlook 2013 OECD,2013-07-23 The OECD Employment Outlook 2013 looks at labour markets in the wake of the crisis It also includes chapters employment protection legislation benefit systems employment and training programmes and re employment earnings and skills afer job loss *The Review of Economic Statistics* ,1926 *Environmental Performance Reviews* United Nations Publications,2017 Environmental Performance Review Tajikistan
