[Avoiding Potholes in Translation](#) Phindile Dlamini, 2023-12-01. This book is a

comprehensive introduction to translation studies between English and isiZulu. It incorporates crucial concepts for understanding the basics of translation within a South African language context and lays a foundation for further studies in translation. The book's content coverage, while broad, is also in depth, and it skillfully integrates examples from varied types of texts. The practical and accessible style makes it both engaging and informative. The diverse examples illustrate not only the technicalities of translation as a process but the vivid dynamics brought about by the fact that the languages involved in the translation process belong to different language families. The use of these examples for almost every aspect of translation explained makes this book unique and valuable to translation scholars and practitioners alike. Even though the book uses cases from the isiZulu language, it is an applicable reference for translation scholars and practitioners working with different indigenous languages of South Africa. Stephanie Rudwick, 2021-08-29. Grounded in ethnography, this monograph explores the ambiguity of English as a lingua franca by focusing on identity politics of language and race in contemporary South Africa. The book adopts a multidisciplinary approach which highlights how ways of speaking English constructs identities in a multilingual context. Focusing primarily on isiZulu and Afrikaans speakers, it raises critical questions around power and ideology. The study draws from literature on English as a lingua franca, raciolinguistics, and the cultural politics of English and dialogues between these fields. It challenges long-held concepts underpinning existing research from the global North by highlighting how they do not transfer and apply to identity politics of language in South Africa. It sketches out how these struggles for belonging are reflected in marginalisation and empowerment and a vast range of local, global, and glocal identity trajectories. Ultimately, it offers a first lens through which global scholarship on English as a lingua franca can be decolonised in terms of disciplinary limitations, geopolitical orientations, and a focus on the politics of race that characterize the use of English as a lingua franca all over the
