Kindergarten Play Scripts:

The Child in the World Eva M. Simms, 2008 *The Child in the World* builds a bridge between continental philosophers who tend to overlook child existence and developmental psychologists who often fail to consider the philosophical assumptions underlying their work. In this volume author Eva M. Simms draws on both psychological and phenomenological research to investigate child existence in its cultural and historical context and explore the ways children interact with the world around them. Simms examines key experiences of childhood with special attention to the non dualistic nature of the child's consciousness and the understanding that there is more to the child's experiences than cognitive processes. In chapters that proceed from infancy to early childhood, Simms considers how children live, their embodiment coexists with others' experience, and the spaces and places of their neighborhoods have deeply felt relations to things, grasp time intuitively, and often in contradiction to adult clock time, and are transformed by the mystery of the symbolic order of play and language. Simms's approach is particularly informed by the philosophy of Maurice Merleau-Ponty, which allows for a descriptive and grounded understanding of child experience as well as sophisticated and critical philosophical thinking about human existence in general. By respecting and celebrating the magical, non dualistic relationship child consciousness has to the world, *The Child in the World* offers readers a unique opportunity to expand their understanding of human existence. Students and teachers of psychology and philosophy, early childhood educators, psychotherapists, as well as general readers who are parents of young children will enjoy this fascinating volume.

Young Children's Play Jeffrey Trawick-Smith, 2019-08-16 *Young Children's Play: Development, Disabilities, and Diversity* is an accessible, comprehensive introduction to play and development from birth to age 8 years that introduces readers to various play types and strategies and helps them determine when intervention might be needed. Skillfully addressing both typically developing children and those with special needs in a single volume, this book covers dramatic play, blocks, games, motor play, artistic play, and non-traditional play forms such as humor, rough and tumble play, and more. Designed to support contemporary classrooms, this text deliberately interweaves practical strategies for understanding and supporting the play of children with specific disabilities (e.g., autism, Down syndrome) or physically challenging conditions and those of diverse cultural backgrounds into every chapter. In sections divided by age group, Trawick-Smith explores strategies for engaging children with specific special needs, multicultural backgrounds, and incorporating adult-child play and play intervention. Emphasizing diversity in play behaviors, each chapter includes vignettes featuring children's play and teacher interactions in classrooms to illustrate core concepts in action. Filled with research-based applications for professional practice, this text is an essential resource for students of early childhood and special education, as well as teachers and coaches supporting early grades or inclusive classrooms.
